Ref: Class II Permissive Change

FCC ID: 2AOL2-P0100HF

Dear Sir or Madam,

The reason for the request of this change is to address the integration of the module into a portable host device P0100HFW1A00 that includes adding a new antenna.

Only the Wi-Fi portion of the module will be used in the end product with the new antenna, the Bluetooth (Classic and BLE) functionality of the module will be disabled.

The end product also contains a Qorvo Module DWM-3001C (FCC ID: 2A35D-DWM3001) which is using its UWB Technology on CH9 for Location Tracking and the BLE Radio for firmware updates. Both radios meet the SAR exemption requirements (UWB < 1 mW, BLE 1.0375 mW).

Sincerely,

A handwritten signature in black ink, appearing to read "BA", is positioned on a light blue rectangular background.

Brandon Ayers
