RE: Nokia Corporation Ltd  
FCC ID: ORE-C110-C11  
Ref. #: EA97616

Dear Mr. Tannahill and Mr. Chan,

The purpose of this letter is to request the release of the above referenced pending application at the FCC. This application was filed prior to the TCB approval route implementation. However, at this juncture, our client Nokia prefers that we cancel this pending application at the FCC and process via the TCB approval route in order to accelerate the process. I believe Mr. Terry Mahn of Fish and Richardson spoke to your regarding this yesterday and it is our understanding that there is a backlog for you at this time and the approval date for this particular grant may not occur for some 2 – 4 weeks. This is understandable since you are the only one there to review the SAR and MPE data at this time and we understand that there are other applications in front of this one.

Please take whatever steps necessary to cancel this application so that we may approve it via the TCB route as soon as possible. Our client does intend upon using the same identifier, so we would need for this identifier to be released from the FCC Database. We also understand that the client would not be refunded the application fee and this is acceptable to our client.

Our TCB reviewer is currently reviewing the application today and this weekend. We would greatly appreciate it if the FCC identifier may be released by 7/17/00. Thank you again for your kind assistance with this matter and please contact me directly if you have any questions or concerns regarding this request.

Best Regards,

Shelley Grandy
