FCC Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. When using this device, a distance of 20cm to the user should always be maintained.

This radio transmitter (24839-WBR01) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device. When using this device, a distance of 20cm to the user should always be maintained.

Le présent émetteur radio (24839-WBR01) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur. Lors de l'utilisation de cet appareil, une distance de 20 cm par rapport à l'utilisateur doit toujours être maintenue. Dipole, 3dBi, 50ohm

Thank you for choosing the

Thermostats

In a radiant-heated home, multiple thermostats control different areas, or “zones”, in the home. When programming a thermostat, it’s important to understand the selections you make will only affect that particular zone.

To begin, simply “tap” the center of the thermostat, then tap again to adjust the temperature to your liking. Tapping the  icon will provide access to a tutorial, settings and programming options to help ensure each area of your home is optimized for comfort and energy savings, no matter the time of day.

Warmboard Bridge

Contained in this box is the Warmboard Bridge. The Bridge acts as a portal to connect the Warmboard Comfort System to your home network. This is not a required feature, but it will allow you to access the system from your smart phone, and should the need arise, allow Warmboard to remotely troubleshoot any issues you are having. The Bridge also allows your Warmboard Comfort System to maintain an accurate date and time and can receive essential software updates.

1

Remove the Bridge from the packaging. Then, lift the inside of the box to reveal the provided Ethernet cable.

2

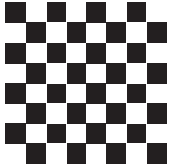

Connect the provided Ethernet cable to an available port on your home’s Internet router

3

Connect the other end of the cable to the Bridge, then plug into an available power outlet.

Once this is done, you can download the “Warmboard Vacation” app for Android/iOS. Follow those instructions to sync your mobile device to your new **Warmboard Comfort System**.

Once the app is installed, scan this QR Code to sync the app to your system. That’s it!

If you’re like us, you’ve probably got a brand new drawer to hold all kinds of important information about your house. We humbly request we get added to this drawer just in case you need this information sometime down the road.

Thank you again for choosing Warmboard.
