**Correspondence Reference No.: 12475**  
**Request for Additional Info.: 03/03/2000**

Dear Errol / Kwok:

Submitted herewith, on behalf of LG Information & Communications, Ltd., is an amendment in response to your e-mail dated January 05, 2000 requesting additional information for the subject application.

1. Attached is the head SAR test plots showing illustration for antenna IN configuration confirming peak SAR location. Please note that the antenna OUT illustrations were inadvertently submitted.
2. Attached is the body SAR test plots showing illustration for antenna OUT configuration confirming peak SAR location. Please note that the antenna IN illustrations were inadvertently submitted.
3. We confirm that there is no optional holster/belt-clip accessory available for this phone (please see attached letter from LGIC). The phone was tested for body SAR with a fixed separation distance (2.5cm). The submitted RF exposure manual warning statement was inadvertently filed stating the use of an optional holster/belt-clip accessory item.
4. Attached is the revised RF exposure manual warning statement which will be placed in an obvious location towards the front of the user's manual (please see attached letter from LGIC).
5. We will make sure that all body-worn SAR tests are performed with specific accessories designed to be used with the phone/device.

We trust this information is sufficient to issue the grant asap. If you have any further questions, please do not hesitate to contact us. Thank you.

Sincerely,

  
Randy Ortanez  
President & Chief Engineer
