

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A red cable connects the analyzer to a power supply unit on the floor. To the right is a large, empty wooden table. The background is a plain wall with a power outlet strip.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test chamber. The walls are lined with white, square-shaped electromagnetic interference (EMI) shields. In the center, a white test fixture sits on a metal stand. A metal frame is positioned in the foreground, and a yellow and black striped caution line is marked on the floor.
