

Get into the car and turn on the ignition

Wireless installation

Suitable for all cars

Automatic connection is established between the cell phone and the handsfree system

Answer your calls simply by pushing the middle button on the remote control

You may now have your conversation via the Bluetooth™ handsfree system

To end the call, push the same button once again

Voice Recognition is started by pushing the upper or middle button with following features:

- "Setup" changes
- "Dial" + "Number"
- "Redial"
- "Call" + "Name"
- "Phonebook"

The remote control unit covers also the features:

- Call answering
- Call ending
- Audio transfer to cell phone
- Change to another incoming call
- Volume regulation of the loudspeaker

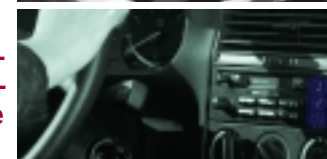

This is the ultimate combination of safety and luxury with integrated high performance voice recognition!

Just place your cell phone anywhere in your car and it is automatically connected to the Bluetooth™ handsfree unit which allows you to handle your wireless calls safely.

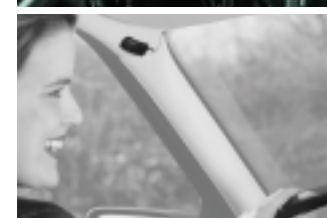

Place your cell phone anywhere in your car ...

...The remote control allows you to answer calls, to activate the integrated voice command system and to regulate the loudspeaker volume

...The kit also includes the microphone for mounting inside the car
