# About This Guide

This guide provides a brief introduction to Deco Whole Home Mesh Wi-Fi 6 System and the Deco app, as well as regulatory information.

Features available in Deco may vary by model and software version. Deco availability may also vary by region or ISP. All images, steps, and descriptions in this guide are only examples and may not reflect your actual Deco experience.

## Conventions

In this guide, the following conventions are used:

Convention	Description
Deco	Stands for Deco Whole Home Mesh Wi-Fi System/Unit.
<u>Underline</u>	Hyperlinks are in teal and underlined. You can click to redirect to a website or a specific section.
Teal	Key information appears in teal, including management page text such as menus, items, buttons and so on.
 Note:	Ignoring this type of note might result in a malfunction or damage to the device.
 Tips:	Indicates important information that helps you make better use of your device.

## More Info

- Specific product information can be found on the product page at <https://www.tp-link.com>.
- A Technical Community is provided for you to discuss our products at <https://community.tp-link.com>.
- Our Technical Support contact information can be found at the [Help](#) center of the Deco app and the [Contact Technical Support](#) page at <https://www.tp-link.com/support>.

## Speed/Coverage/Device Quantity Disclaimer

Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage, and quantity of connected devices are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

## MU-MIMO Disclaimer

Use of MU-MIMO requires clients to also support MU-MIMO.

## IoT Compatibility Disclaimer

IoT compatibility refers only to smart devices that can be controlled via the Deco app. Other wireless devices can still connect to Deco for normal Wi-Fi use.

## Seamless Roaming Disclaimer

Clients need to support 802.11k/v/r and may require additional set up. Performance may vary depending on the client device.

# Appearance

Each Deco has an LED that changes color according to its status, two RJ-45 Ethernet ports, a power slot, and a Reset button.

See the explanation below:

# Set Up Your Deco

The intuitive Deco app guides you through an easy setup process that gets each unit up and running and all your devices connected and online. Follow the steps below to set up your Deco Whole Home Mesh Wi-Fi 6 System.

## 1. Download and install the Deco app

Scan the QR code below or go to Google Play or the Apple App Store to download the Deco app. Install the app on your Android or iOS smartphone or tablet.

or

## 2. Log in or sign up with TP-Link ID

Open the app. Use your TP-Link ID to log in.

If you don't have a TP-Link ID, tap SIGN UP. The Deco app will guide you through the rest.

## 3. Identify Your Deco

Identify your Deco from the model list.

#### 4. Connect Deco to your modem

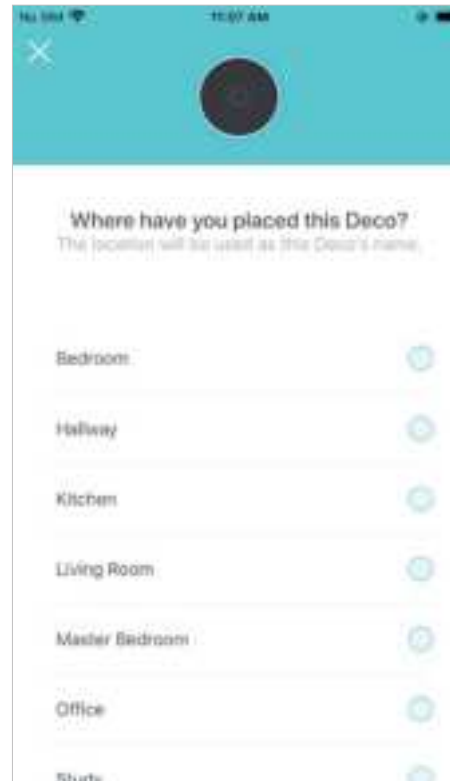

Power off your modem. Connect your Deco to the modem and power them both on.

If you don't have a modem, connect the Ethernet outlet directly to your Deco.

#### 5. Select a location

Select a location for this Deco. If its location is not listed, you can create a new one by choosing Custom.

#### 6. Set up internet connection

Select the internet connection type and enter the information. If you are not sure, contact your internet service provider.

## 7. Create your Wi-Fi network

Set a network name and a password. These will be the name and password you use to connect your devices to Wi-Fi.

## 8. Connect to your Wi-Fi network

Connect your devices to the Deco's Wi-Fi to continue the setup.

## 9. Setup complete

Your Deco network is now up. Add more Decos or complete the setup and connect all devices to the Deco network.

# Dashboard

After you successfully set up your Deco network, you will see the dashboard of the Deco app. Here you can get an overview of the network status, customize your home network with enhanced security using a kit of features built to TP-Link HomeShield and set up various advanced features.

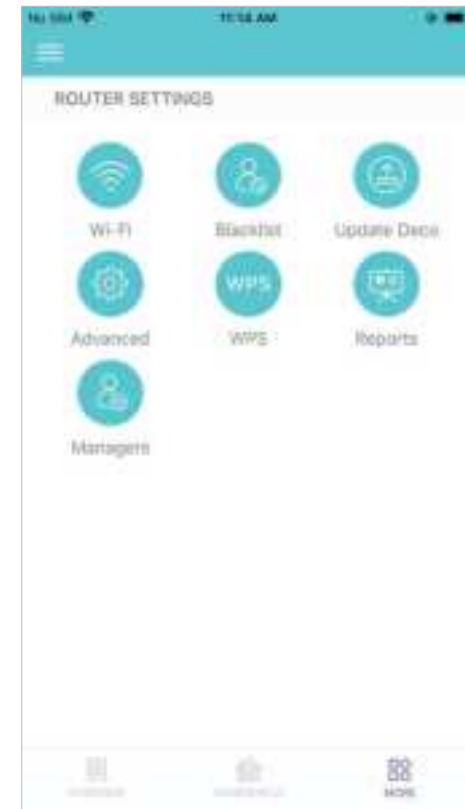

Tap  to get an overview of the network status

Tap  to enter the [HomeShield](#) page for enhanced security

Tap  for more features

# Overview

In the Overview page, you can check the working status of all the Decos, manage the connected devices, add more devices, use friends of Deco, and more.

Tap  to enter OVERVIEW

Tap  to create new networks or select a network

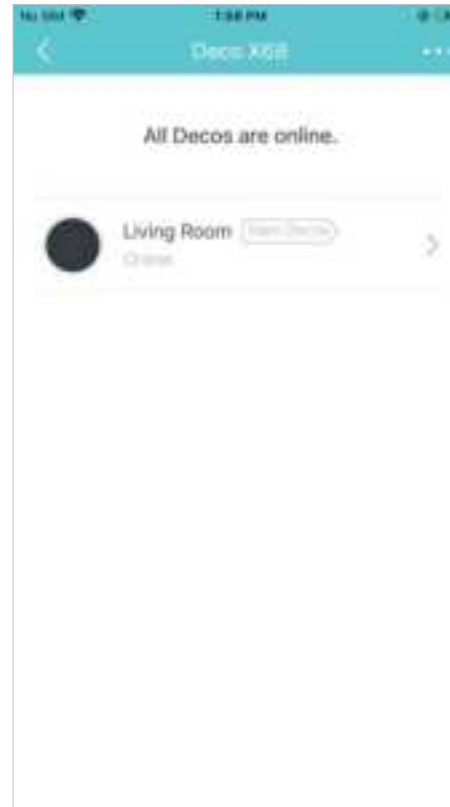

Tap  to add more devices

Tap  on the Dashboard to view notifications about new devices, Deco updates, monthly reports, and more

Tap  to check all Decos' status

Select a Deco to view the details

Tap a client on the Device List to check the details

\*Tap [Belongs to](#) to add a unique profile for the device

Swipe right to open the menu for more information about Deco

On the menu, tap [Wi-Fi Detective](#) >  to discover all devices connected to the current Wi-Fi network

# HomeShield

Whether protecting your network from malicious attacks, managing your family's online activities, or prioritizing devices to get better performance, TP-Link HomeShield provides you a kit of features to enhance your whole home network with enhanced security. You can even get non-stop protection for all the devices in you network after you subscribe to [HomeShield Pro](#).

Tap  > HomeShield

Scan to check and optimize network security and performance

Tap  to check regular reports, including time spent online, traffic usage, most visited websites and more

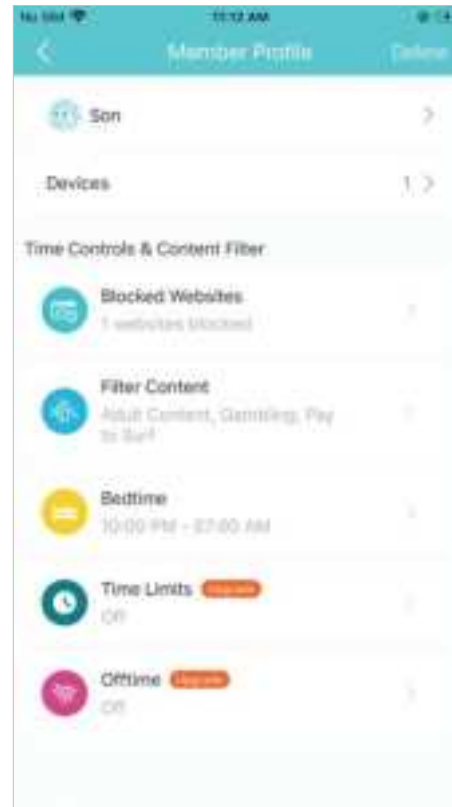

Create profiles for your family members to easily manage their online activities

Set time controls and content filter for your family members

Tip: Subscribe to the [HomeShield Pro](#) service to enable Time Limits, Offtime and custom the Bedtime feature.

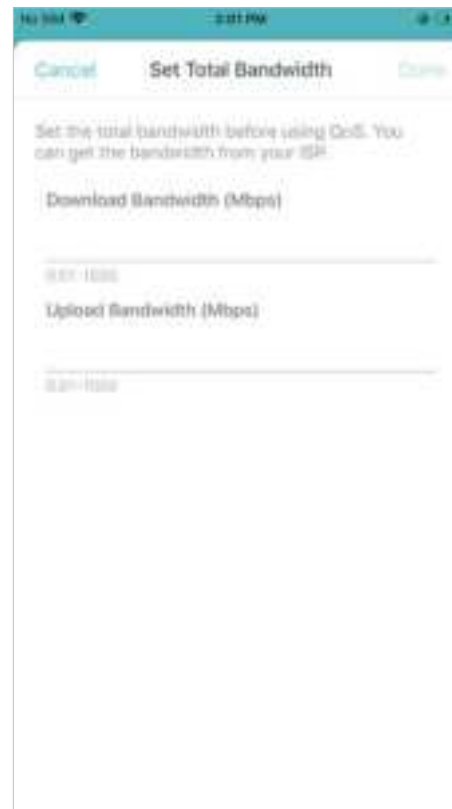

Tap a profile to check the online data or pause the network with one tap to enjoy family time

Enable QoS to prioritize your devices that are most important to you

Set the total bandwidth before using QoS

Add devices that are important to you as high priority to ensure a good network experience

# HomeShield Pro

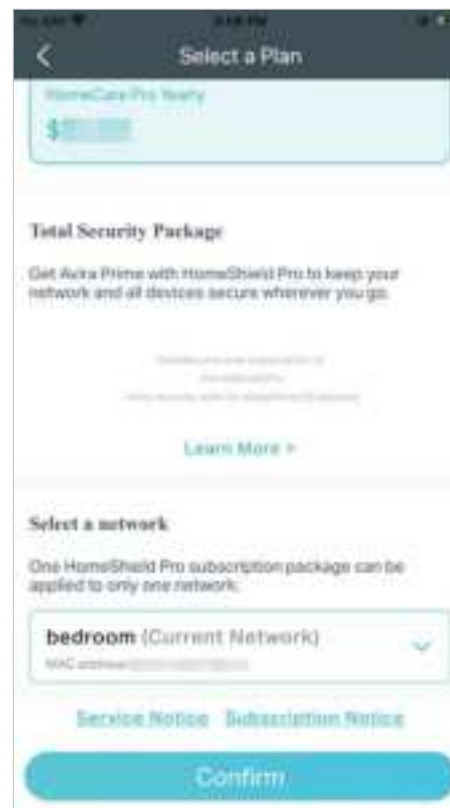

Upgrade to HomeShield Pro and get all premium features to enjoy comprehensive home network protection.

Upgrade to HomeShield Pro and get a 1-month free trial now

Set a plan and apply a network for use

Note: One HomeShield Pro subscription package can be applied to only one network. You can switch the bounded network whenever you like.

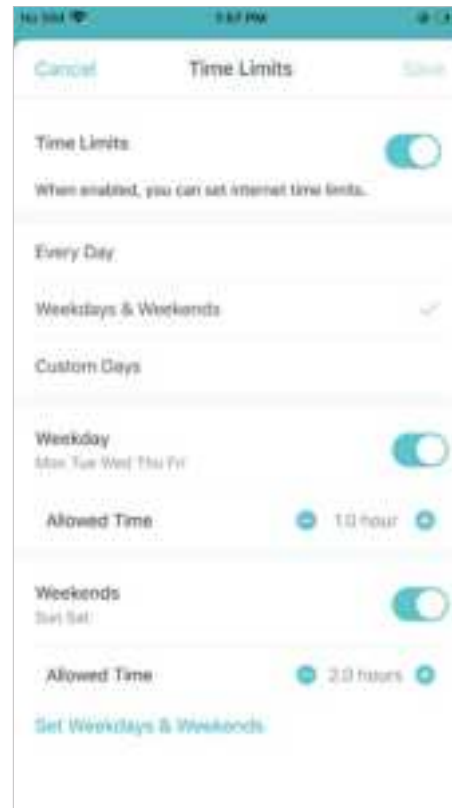

Enable [Real-Time Protection](#) to protect your home network from attacks and keeps your personal information secure

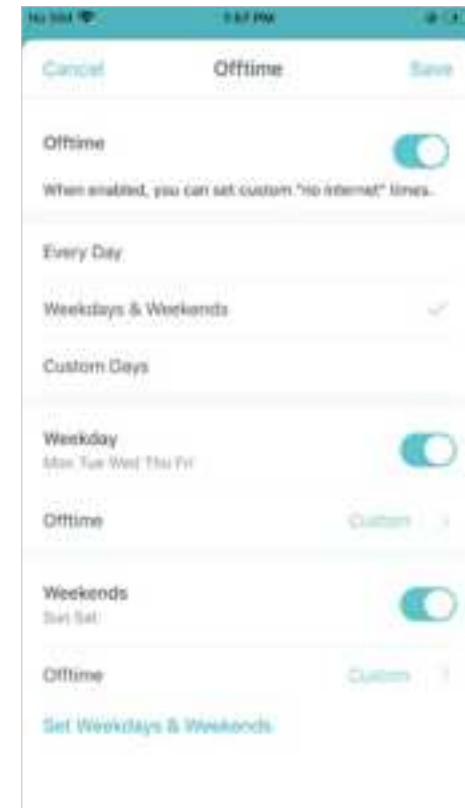

Set flexible bed time schedules

Limit the time for internet in [Time Limits](#)

Customize "no internet" times in [Offtime](#)

# Wi-Fi Settings

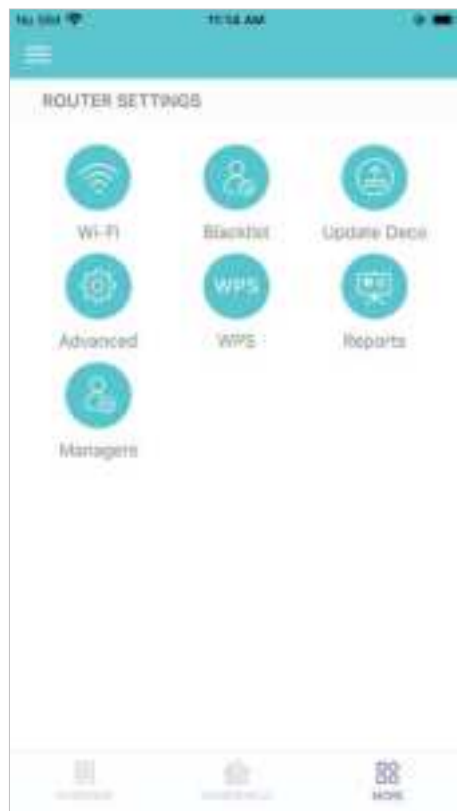

You can change the network name and password of your main network, create a separate network for guests, and shake your device to share the network details easily with family and friends.

Tap  > Wi-Fi

Manage main Wi-Fi network

Enable guest network

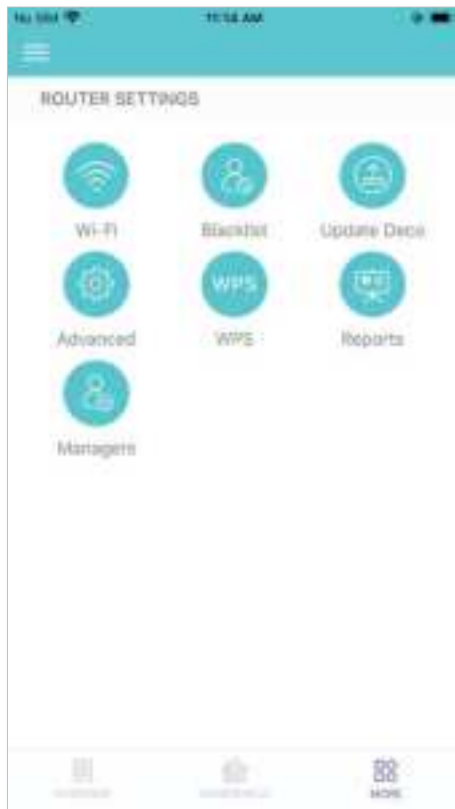

Shake to share your network

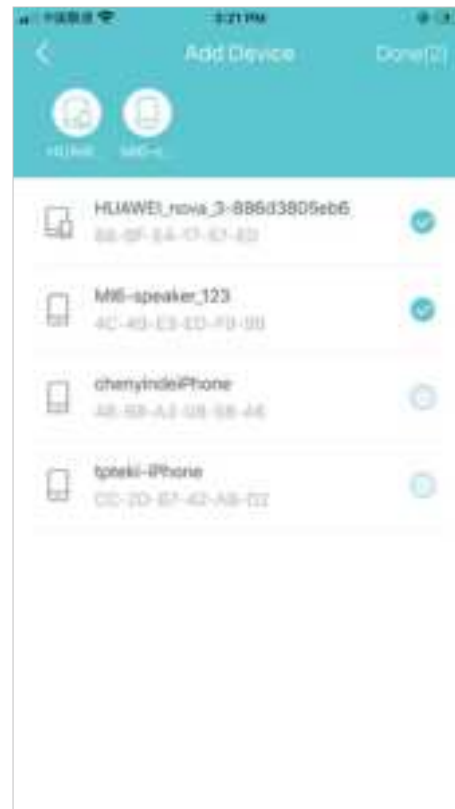

# Blacklist

Compile a blacklist to avoid devices added on the blacklist to access to your network, ensuring the safety of your personal information shared in the network.

Tap  > Blacklist

Add clients to blacklist

Add devices to blacklist

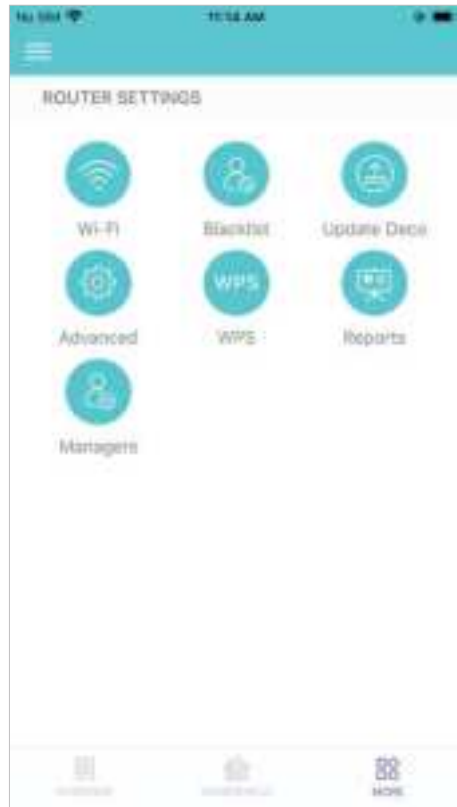

Manage blacklist

# Online Update

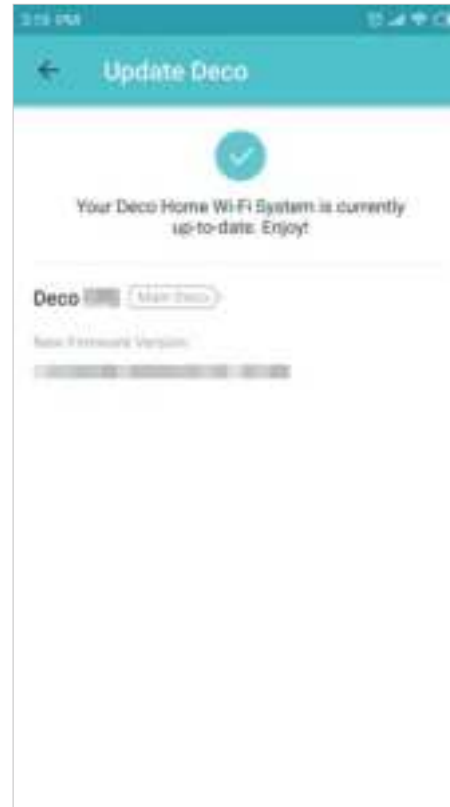

TP-Link is dedicated to improving product features and providing a better customer experience. An up-to-date firmware provides better and more stable network performance. Always update your Deco to the latest firmware version when prompted in the Deco app.

Tap  > Update Deco

Update your Deco to the latest version

 Tip: If the firmware update fails, please reboot the main Deco, move the Satellite Deco closer to the main Deco, then try to update again.

# Advanced Features

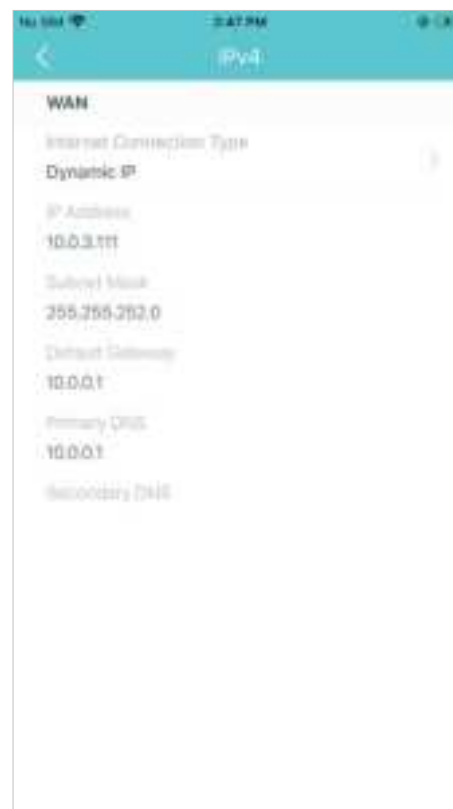

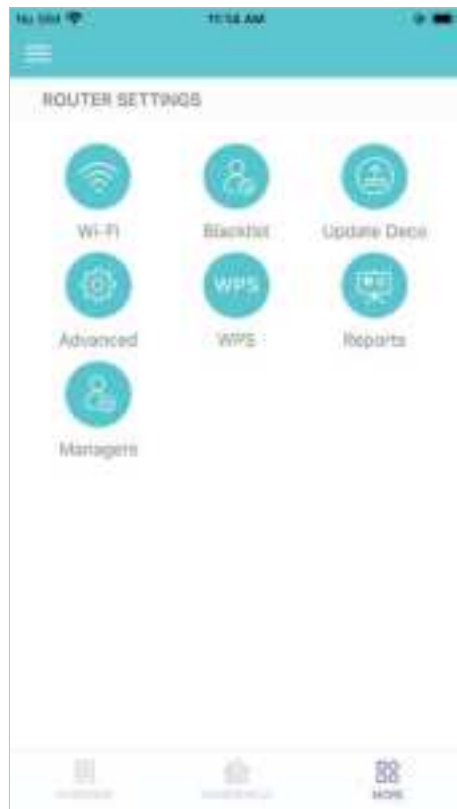

Additional features are available under the Advanced menu. You can modify WAN settings (IPv4 & IPv6), add IPv6 firewall rules, modify LAN IP, set up DHCP server, enable VLAN/IPTV/MAC Clone mode, reserve the same IP address for a specific device, set up port forwarding rules to make your local computers accessible to other devices over the internet, enable TP-Link DDNS, SIP ALG, fast roaming and beamforming, control Deco's LED, change the working mode, and configure the notification settings.

Tap  > Advanced

View IPv4 details or change the internet connection type

Enable IPv6

Add IPv6 firewall rules

Modify LAN IP

LAN IP

192.168.68.1

Subnet Mask [Custom](#)

255.255.252.0

Set DHCP server

DHCP Server

22 IP addresses assigned

Start IP

192.168.68.100

End IP

192.168.68.250

Default Gateway

192.168.68.1

Primary DNS (Optional)

Secondary DNS (Optional)

Enable IPTV/VLAN mode

IPTV/VLAN

IPT Profile

Select

Note: When IPTV is configured, the other port of main device can be used to support IPTV service and can only be used for this service.

Enable MAC Clone

MAC Clone

Use Client MAC Address

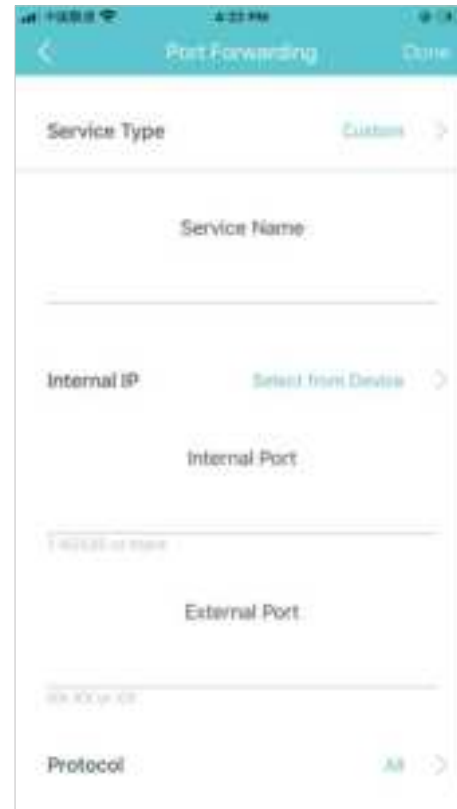

Use Custom MAC Address

Tip: Make sure you select or enter the MAC address specified by your ISP.

Reserve IP addresses for specific devices

Set up Port Forwarding rules

Register a TP-Link DDNS domain name

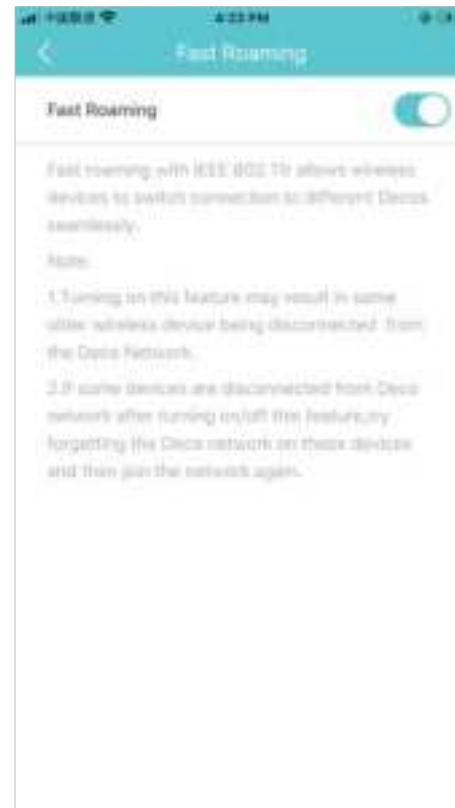

Enable SIP ALG

## Enable UPNP

## Enable Fast Roaming

## Enable Beamforming

## Enable LED Controls

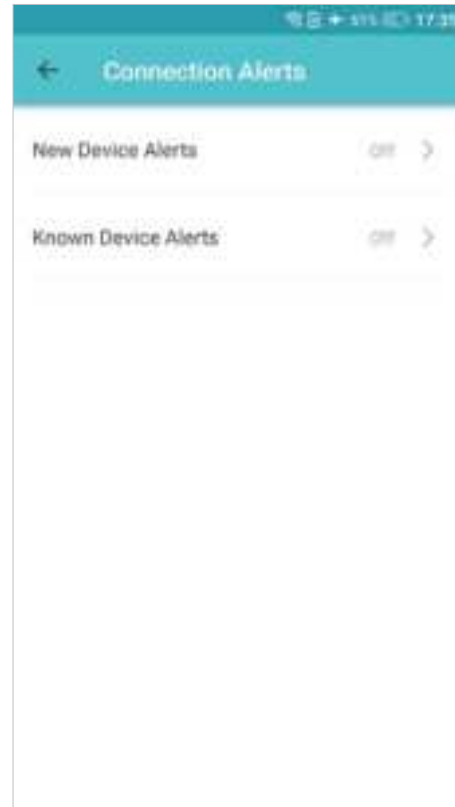

## Change the operating mode

Note: When the Deco works in Access Point mode, advanced features such as HomeShield, IPv4, Address Reservation, Port Forwarding, and DHCP server are not available.

## Set connection alerts

## Set notifications

Note: If the Notifications option shows "Disabled", go to Settings > Notifications on your mobile device to enable it.

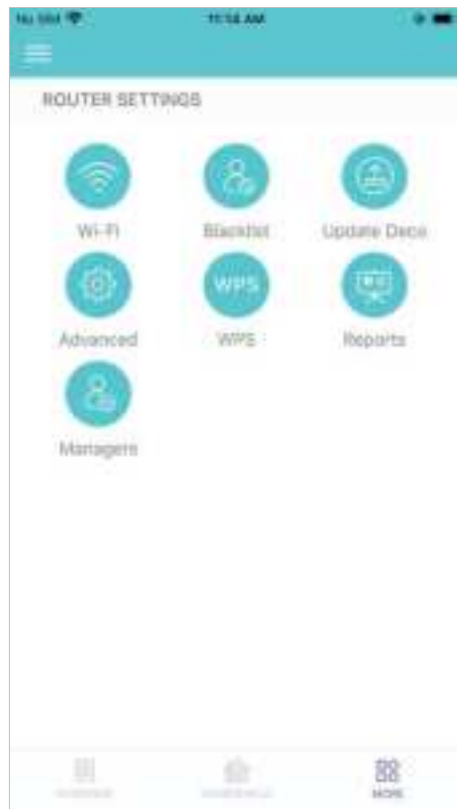

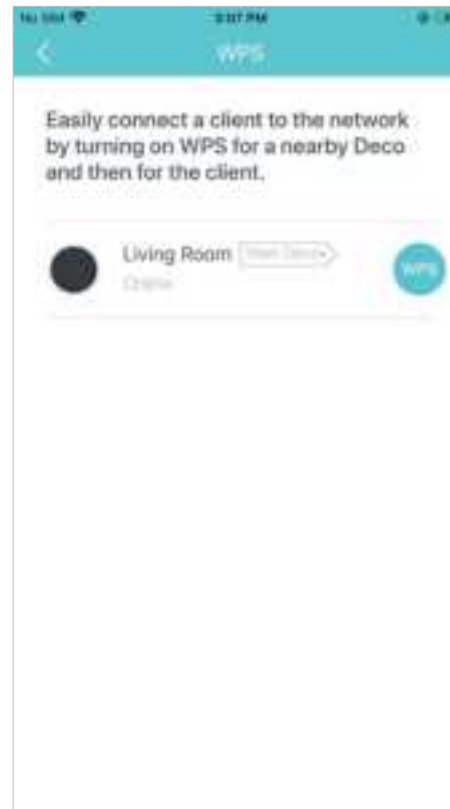

# WPS

WPS (Wi-Fi Protected Setup) helps you to quickly and securely connect a client to a network with a tap without entering any password.

Tap  > WPS

Tap the **WPS** icon on Deco app and then on your client

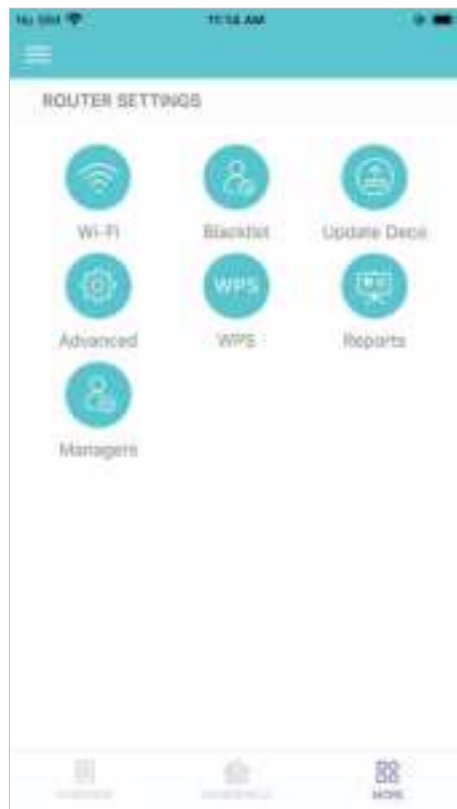

Successfully connected to the network

# Weekly/Monthly Reports

Review the weekly or monthly usage reports, such as security threats and total connected network devices each day.

Tap  > Reports

View weekly / monthly reports

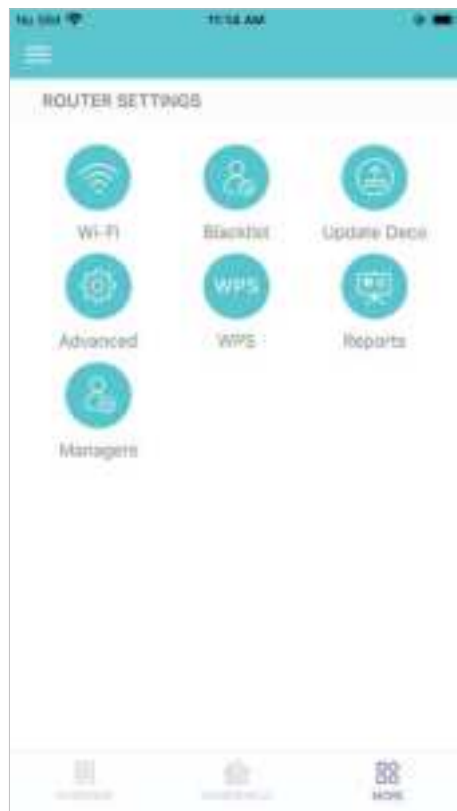

Enable or disable weekly and monthly reports

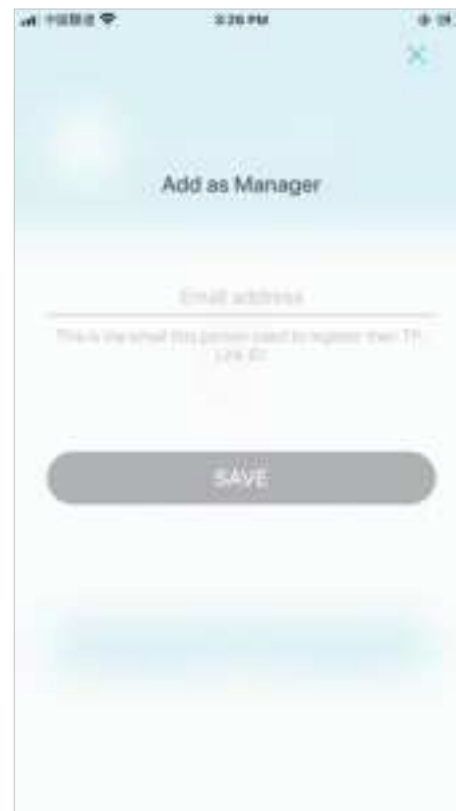

# Managers

Add friends and family members to help manage your network. Each manager should have their own TP-Link ID.

Tap  > Managers

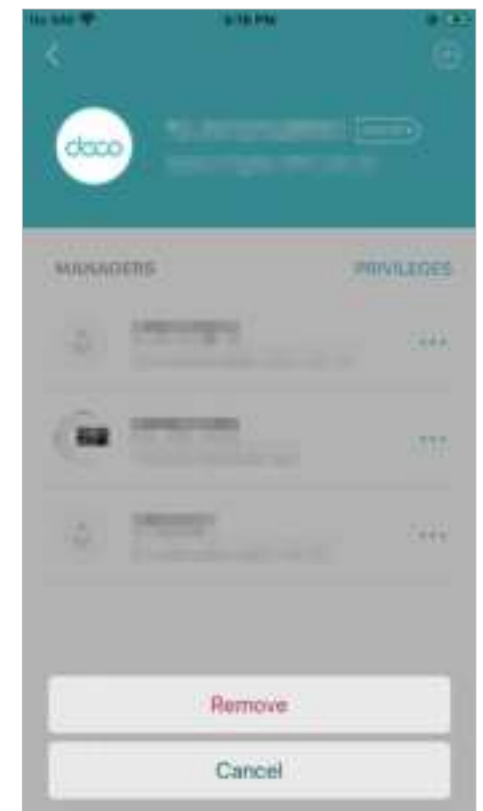

Add other accounts as managers

Set privileges for managers

Remove managers

# Authentication

## FCC Compliance Information Statement

**Product Name:** AX3600 Whole Home Mesh Wi-Fi 6 System

**Model Number:** Deco X68, Deco X3600, Deco W7200

Component Name	Model
I.T.E POWER SUPPLY	T120250-2B4

### Responsible party:

**TP-Link USA Corporation, d/b/a TP-Link North America, Inc.**

Address: 145 South State College Blvd. Suite 400, Brea, CA 92821

Website: <http://www.tp-link.com/us/>

Tel: +1 626 333 0234

Fax: +1 909 527 6803

E-mail: [sales.usa@tp-link.com](mailto:sales.usa@tp-link.com)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/ TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

### **FCC RF Radiation Exposure Statement**

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

"To comply with FCC RF exposure compliance requirements, this grant is applicable to only Mobile Configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 25 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter."

Issue Date: 2020-09-07
