

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden bench. A red cable connects it to a power line interface unit (PLI) mounted on a wall. Below the PLI, a power supply unit is connected to the test equipment. To the right, a wooden table holds a small antenna and other test components. The background is a plain wall with a power outlet.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test setup. A white, box-like test item is placed on a turntable. The turntable is mounted on a metal frame with a circular base. The entire setup is inside an anechoic chamber, with white, square-shaped absorbers visible on the walls and floor. The floor has yellow and black striped safety markings.
