

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. The green printed circuit board (PCB) is visible, featuring various electronic components including a microcontroller, capacitors, and connectors. The housing is black and semi-circular. A black ruler with white markings is placed horizontally below the housing for scale, showing measurements in millimeters.
EUT Housing and Board View 2	 A photograph showing the internal components of an EUT housing from a different angle. The black housing is open, revealing the internal structure. A black ruler with white markings is placed horizontally below the housing for scale, showing measurements in millimeters.

EUT Housing and Board View 3	 A photograph showing the internal components of a device. On the left is a black plastic housing with a circular opening. To its right is a small, round, silver-colored component, likely a battery or a small PCB, with some electronic components visible on its surface. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The background is a blue textured surface.
EUT Housing and Board View 4	 A photograph showing two circular components. The one on the left is a copper-colored coil or inductor. The one on the right is a dark, circular component, possibly a lens or a small PCB. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The background is a blue textured surface.

Solder Board-Component View 1	 A photograph of a circular electronic component, likely a microcontroller or sensor, mounted on a blue textured surface. The component is a small, dark, circular board with various electronic components visible, including a small display screen and several pins. It is positioned next to a black ruler with white markings, which shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 2	 A photograph of the same circular electronic component, showing a different view. The component is a small, dark, circular board with various electronic components visible, including a small display screen and several pins. It is positioned next to a black ruler with white markings, which shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 3	 A photograph of a small green printed circuit board (PCB) component, identified as 'View 3'. The component is L-shaped and features a USB-A connector on one end and several surface-mounted components, including a small integrated circuit and resistors. It is placed on a blue textured surface next to a black L-shaped ruler with white millimeter markings for scale.
Solder Board-Component View 4	 A photograph of the same green PCB component, identified as 'View 4'. This view shows the opposite side of the component, which has a white square solder mask or label on one end and various surface components. It is positioned next to the same black L-shaped ruler on a blue textured background.
