Letter of Changes

To whom it may concern,

We would like to submit for C2PC based on the following changes to the Garage Door Opener (GDO). The revised Garage Door Opener has a new optional auto power lock feature. This lock feature helps to secure the garage door in the closed position to prevent unwanted forced entry. To make this change, here are the revisions made,

- PCB grew 0.040" to accommodate the 2 new connectors.
- 2 new PCB connectors for the locks.
- 1 new PCB mounted relay.
- Speaker was moved to an unused location just down somewhat on the PCB.
- The power supply was moved to the corner of the PCB.

It is important to note that the radio and its circuitry, the Wi-Fi module and its circuitry, the antenna's and circuitry, and the microprocessor were all left unchanged. There were no new parts added except as mentioned above.

I would appreciate your prompt attention to the submittal. If there are any questions, please call me at 630-993-6306 or send a fax to 630-516-6863.

Sincerely,

Barbara Kelkhoff
