McLean, VA 22101

**To WHOM IT MAY CONCERN:**

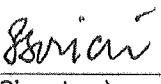

About FCC ID: 2APBOAN400 & IC: 23717-AN400

There is one model only. There are four different configurations with two types of power boards namely Chicony and ZB Power versions as well as two types of motors namely Nidec and Hengdrive versions.

Power boards of Chicony and ZB Power have same input & output electrical parameters (schematic design is completely different);

Motors of Nidec and Hengdrive have same speed of revolution (electrc design is completely different);

All other hardware is identical; All firmware is identical.
