Re: Change of Identification Authorization, FCC ID: PD93945BGX (original FCC ID)

Date: March 1, 2006

To Whom It May Concern:

This letter grants authorization for representatives of Toshiba Corporation to apply to the FCC for a change in identification as specified under 47CFR2.933 of the FCC rules.

This authorization applies to Intel Corporation 802.11b/g PCI Express mini card (EUT name), FCC ID: PD93945BGX (original FCC ID). We are aware that Toshiba Corporation intends to market the above referenced product under their own FCC ID: CJ6UPA3440WL (FCC ID from Toshiba Corporation).

Except for the product label and model name(s), the 802.11bg Mini-Card, Intel PRO/Wireless 3945ABG BGX Network Connection, FCC ID: PD93945BGX is 100% identical to the already FCC and Industry Canada approved Intel Corp. model number WM3945ABG BGX FCC ID: PD93945BGX. This device will continue to be manufactured by Intel Corporation.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert Paxman", written over a horizontal line.

Robert Paxman
Sr. Compliance Engineer
Intel Corporation
