
HD955 Pica GSM

“A Full Featured Phone for the Advanced Business user in a Small and Sleek Package offering a Big Display for easy use”

NOKIA 7190

Sales argumentation:

*** High Quality, Large Display**

- High quality pixel display for easier reading (larger fonts, more text lines)
- Large display for easier reading of full length SMS messages
- Ease of use with context sensitive soft key interface

*** Advanced Wireless Solutions**

- Infrared for cordless communication between phone and PC and printers (no cable hassle)
- Phone-to-phone infrared transfer of names, phone numbers and messages
- WAP compliant product supports VAS

*** Advanced Digital Features**

- Future proof UI supporting GSM Phase 2+ features available
- Alternative line service with 2 lines: Multiple lines offer a personal line and a business line with separate ringing tones and call forwarding options
- High speed data support (14,4 kbps)

*** Superior Audio**

- Enhanced Full Rate voice codec
- Omni directional / noise cancelling microphone
- Leak tolerant speaker

*** Superior Performance**

- Extended performance provided by true 3V engine
- With standard battery up to 5h talk time and 20 days standby time, with performance battery up to 9h talk time and 33 days standby time

*** Lifestyle Personalization**

- Profile settings allows adjustment of phone to your environment and lifestyle
- Personal ringing tones recognize caller by tone
- Games: play yourself or others using IR link
- Animated CLI icons **

*** Ergonomic Design**

- Roller key for faster scrolling and easy selection
- Small without sacrificing functionality, features and performance
- Modern sleek styling and comfortable tapered form supporting the large display

*** Broad range of accessories**

- Full range of Nokia accessories as well as new advanced data accessories PC Suite
