Attention: Joe Dichoso  
Applicant: E.F. Johnson Co.  
Equipment: FCC ID: ATH2422008 EA312905  
Reference: Correspondence 22417

Dear Mr. Dichoso:

This is in reply to your referenced correspondence.

The unit corresponding to ATH2422008 is a 25 to 85 Watt transmit unit. There is a companion product under the identifier ATH2422008-1 that is a 75 to 175 Watt transmitter. (The ATH2422008-1 has also been submitted for permissive change.) The manual that we supply covers both products. Each product is listed with its corresponding schematics and technical information.

The ATH2422008 product is not capable of operation above 85 Watts, and we agree that the 85 Watt limit is correct for that product.

I am sorry for the confusion.

Sincerely,

John Oblak  
Chief Engineer, E.F. Johnson Co.
