Permissive Change for FCC ID: 2AUAK-VS200

Dear Sir or Madam,

We would like to inform you that there have been changes to our registered Product VS200, as listed below. In conclusion, these changes are different optimizations that simply ensure easier assembly, installation and servicing. Nothing has changed in the radio unit, it is identical to the already registered previous device.

Electrical modifications:

- Earthing principle and internal adaptation to the wiring, as well as cable routing

Mechanical changes:

- Optimization of various components to make them easier to install or change during servicing
- Connection of the base unit and loader is mechanically optimized and more stable
- Closing mechanism of the doors
- Transport locks for transportation have been improved, more stability and easier attachment
- New, more stable toothed belt in the loader

The details can also be found in the current EMC report and the associated documentation.

Sincerely,

DocuSigned by:
