Required Exhibits for FCC Certification

## FCC E-Label Information

A. Images of the e-label screen are provided below:

This label is shown on the monitor running the Hawk Maintenance Utility. The Hawk Maintenance Utility is connected to the hawk Maintenance Station via a USB cable

B. Access to the required information on the e-label Users are able to access the information in no more than three steps in a device's menu.

The steps are:

1. Click Firmware from the main window
2. The screen above is displayed.

C. Devices have physical labels at point of marketing/sale visible to the purchaser (or in the alternative, on the packaging), and at time of importation?

- The manual contains the FCC ID of the device
- There is a label which will be fixed to the box containing the 1701E-HMS with the FCC ID shown in document "1701E-HMS – Box Label" attached.

D. Electronic labelling information is programmed into the device by the manufacturer at the time of manufacture.

Yes.

E. Electronic labelling information not modifiable by any third party.

The E-label is hardcoded into the device such that it cannot be altered by a third party

F. All the applicable regulatory information required on the packaging or user instructions is provided according to the rules.

Applicable regulatory information not found in the e-label is contained in the user manual
