

Exhibit 10

SECTION 2.1033(c) (12)

For equipment employing digital modulation techniques, a detailed description of the modulation system to be use, including response characteristics of any filters provided, and a description of the modulating wavetrain, shall be submitted for the maximum rated conditions under which the equipment will be operated.

RESPONSE:

These functions are controlled by the CDMA Baseband Radio (**CBR**), **FCC ID: AS5CMP-26**. The CBR was "Granted" 23 March 1999 for all PCS Blocks. The **CBR / AS5CMP-26** supplies the signals to be amplified. This information was included with the original filing documents for both the **CBR/ AS5CMP-26** and the **ICLA/ AS5CMP-27**. This information is unchanged from the original filings.
