X75 User Guide

Three-mode mechanical keyboard

Warm tip: After receiving the goods, please fully charge before use

X75 three-mode keyboard function description

RGB ambient light-power indicator

Mode switch:
 The top represents 2.4G mode
 The intermediate represents wireless mode
 The USB wired mode at the bottom

Multimedia knob
 Clockwise volume +
 Counterclockwise volume -
 Press to mute

TPV + port

Indicate from top to bottom:
 1. Call light indicator
 2. S-CR indicator
 3. Lock key indicator

Metal magnetic, nameplate
 internal storage layer

Keyboard off: You need to click on the left side of the keyboard to the wind mode, and unplug the off. When the wind mode is on, the keyboard will be in the wind mode 1000Hz, wireless mode 120Hz.

Picture: The pictures in this manual are schematic drawings. They may be different from the real thing, please refer to the real thing.

2.4GZ connection • Hot swappable

• **Manual code alignment:** Switch to 2.4GZ mode on the left side, and then long press F10 key for 3 seconds, the cyan light will flash into the code alignment state. At this time, the 2.4GZ mode will be inserted into the computer port, the code will be set for you, and the 2.4GZ link will be successful. The code alignment is complete. (Factory default has been coded)

① Switch to 2.4GZ mode

② (Remove 2.4GZ receiver) from the lower right corner of the keyboard

③ Plug it into the USB port of the computer and set it

• Wireless connection

① Switch to 2.4GZ mode

② Press the F10 key

③ Plug it into the USB port of the computer and set it

④ Search for matching name

⑤ Press the F10 key again to switch to 2.4GZ mode. (If the 2.4GZ mode is not successful, when the blue indicator is on for 2 seconds, turn off the indicator)

The pairing names of wireless channels 1, 2, and 3 are (MCHOST X75 3.0 or MCHOST X75 3.0S).

Long press the 3-combination key **F7+number key 1 to 3** or the blue light flashes **10 times**, indicating that the keyboard enters the code matching or search mode. You can pair and connect in the device.

The combination key **F7+number key 1 to 3** for 3 wireless devices.

• Wired connection - Hot swappable

① Connect one end of the standard USB Type-C cable to the corresponding port on the keyboard

② Plug the USB end of the cable into the corresponding port on the computer

• Power saving mode

2.4G: Wireless mode in one minute without any operation will automatically enter the power saving mode (light off). Click the **○** to wake up the keyboard.

• Light effect instructions

① Press the **Light Effect** key 15 seconds (the RGB light effects close and a total of 16 kinds of light effects: drift (press the **Light Effect** light effect), shadow, sunrise (press the **Light Effect** light effect), colorful water wall, flower, game mode, off. Press the **Light Effect** key, rotating mode, dream name, trigger, wake in 1 s, off. Press the **Light Effect** key, flow.

- Cooperate with driving with music rhythm RGB light effect, there are 10 light effect modes to choose under this light effect.
- Wired mode and 2.4G mode cooperate to drive each key with custom function and macros definition. The drive can be customized in more than 1 million colors.
- **Power saving mode**
 - Press and hold **H** to view:
 - Current connection mode (2.4G, wireless, wired); Current wireless channel (channels 1, 2, 3)
 - Current system mode (Android, WIN, Mac)
 - The above corresponding buttons will light up, release to reset the light effect.

- 2.4G mode indicator: “” key
- Wireless channel indicator: “1, 2, 3” key
- Wired mode indicator: “F” key
- System mode indicator: “QWERTY” key
