Re: Applicant: Aura Wellness  
FCC ID: 2A9ZM-WROOM32E  
Class II Permissive Change

Aura Wellness requests a Class II Permissive Change for the radio module with FCC ID: 2A9ZM-WROOM32E under FCC ID rule part 15.247. The reason for the Class II Permissive Change is to change the RF exposure conditions to allow for use closer than 20cm to the body. The module will be integrated into the Aura BLE Remote. Therefore, the exemption from RF exposure evaluation was assessed and found to be in compliance at the required minimum user separation distance of 5 mm. The radio module uses Bluetooth Low Energy to communicate with nearby devices to exchange information and commands. Only the Bluetooth radio is enabled for this application.
