

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

Left Earbud

EUT Housing and Board View 1	 A photograph showing the internal components of a left earbud. The earbud housing is black and partially disassembled, revealing a small blue printed circuit board (PCB) with various electronic components. The assembly is placed on a light blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the assembly positioned between the 10mm and 100mm marks.
Solder Board-Component View 1	 A close-up photograph of the blue printed circuit board (PCB) component. The board is populated with various electronic components, including a small black integrated circuit (IC) labeled "CMT-2163" and "Y11199332". The board is placed on a light blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10mm and 100mm marks.

Solder Board-Component View 2	 A photograph showing a small blue electronic component with several gold-colored pins, mounted on a blue printed circuit board (PCB). The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left ranging from 0 to 70 mm and a horizontal scale at the bottom ranging from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical scale and the 40 mm mark on the horizontal scale.
Solder Board-Component View 3	 A photograph showing a small yellow electronic component with two thin wires (one red, one black) attached, mounted on a blue printed circuit board (PCB). The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left ranging from 0 to 70 mm and a horizontal scale at the bottom ranging from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical scale and the 40 mm mark on the horizontal scale.

Right Earbud

EUT Housing and Board View 1	 A photograph showing the right earbud assembly. It includes a black plastic housing, a small blue printed circuit board (PCB) with electronic components, and a black foam ear tip. The assembly is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the earbud assembly positioned between the 10mm and 100mm marks.
Solder Board-Component View 1	 A photograph showing the soldered board component. It is a small blue PCB with various electronic components, including a microcontroller and passive components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10mm and 40mm marks.
