3 Connect Device

Facility

Select "FACILITY", and for subsequent registration and setup, please contact the administrator.

At Home

1. Register Account : Select "AT HOME", create a new account, and fill in personal details. After entering the phone number, an SMS will be sent to the phone for verification, and registration will be completed upon confirmation.

2. Set up Wi-Fi : After logging in, go to the main menu, select "Device Setup" → "Wi-Fi Setup", enter the Wi-Fi name and password, and save.
3. Connect Device : Select "Connect Device", choose the corresponding device from the device list to connect.
4. Device Setup : Enter personal details, set sleep time and emergency contact phone numbers. After confirmation, press "Connect". Wait for the device to successfully connect to Wi-Fi.

Family / Friends

After logging in, you can view family members' activity records, including step count, alarm occurrences, times, and sleep/wake-up times.

4 Function

When the app is not connected (device is not activated), the screen will display the last four digits of the MAC address and battery level.

After device connecting to the app, the screen will display time/ steps/ battery level. The step count for the day will reset at 00:00 the next day.

Press the emergency button, and the alarm will sound for 10 seconds. The screen will remain on until the alarm is cleared by facility staff. (for Facility)

Press the emergency button, and the alarm will sound for 10 seconds, then the screen will return to the clock display. (for At-Home)

5 Battery Charge

1. Please fully charge the power bank. The red light will blink while charging and stay on once fully charged.

2. Open the silicone plug on the device's charging port, connect the power bank, and begin charging.

Device Charging Status
On Charge : Red Light
Fully Charged : Green Light

Battery Discharge Status
Discharging : Green light stays on
Low Battery : Flashing green light

6 Wearing Method

1. Two Wearing Methods:
Watch style and neck-worn style.

※ Choosing the neck-worn style will disable the fall detection feature.

2. Watchband Installation Method

You can change the watchband freely. Please use a 22mm width band.

3. Silicone Case Installation Method

Follow the instructions in Image ① to place the device into the silicone case, then attach the neckband buckle to the silicone case and wear as shown in Image ②.

7 FCC WARNING

Federal Communications Commission Statement

This device complies with FCC Rules Part 15. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by doing one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Exposure

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

To maintain compliance with FCC RF exposure guidelines hold the transmitter and antenna at least 5mm from your body, with the antenna pointed up and away from the body.
