RE: Attestation Statements 6SD Filing – FCC ID: SWX-U7PROO

We, Ubiquiti Inc., attest that this device under FCC ID SWX-U7PROO complies with device protocol requirements and operational restrictions for Standard Power Access Point 6SD.

1. Device Protocol Attestation Statements:
 - a. This device will contact an AFC system at least once daily to obtain the latest list of available frequencies and the maximum permissible power the standard power device may operate with on each frequency at the standard power device's location. If the device fails to contact the AFC system during any given day successfully, the standard device may continue to operate until 11:59 p.m. of the following day, at which time it will cease operations until it re-establishes contact with the AFC system and re-verifies its list of available frequencies and associated power levels - 15.407(k)(8)(iv)
 - b. This device will automatically acquire geolocation and re-register with AFC to obtain frequency and power values after a power cycle.
 - c. If using an external geolocation source, this device will be connected to the standard power device using a secure connection that ensures that only an external geolocation source approved for use with that standard power device provides geographic coordinates to that standard power device. Alternatively, an extender cable may connect a remote receive antenna to a geolocation receiver within a standard power device.
2. Control of or communications with unmanned aircraft systems is prohibited, including drones.

Sincerely,

Alex Macon
Ubiquiti Inc.
Compliance Officer
