

USER'S MANUALS – EXHIBIT H

1.1 MANUALS

Rockwell Collins, Inc. does not supply an instruction book with the VDL-2000 transceiver. The transceiver is supplied to industry customers, and designed to meet the requirements of ARINC 716-8 and ARINC 750. Operating instructions are not necessary because the unit is part of a larger VHF communications system. Rockwell Collins does produce the VDL-2000 Component Maintenance Manual, a comprehensive installation manual which, pursuant to an agreement with the FCC staff, is available upon request but is not included in this electronic exhibit.
