Getac Technology Corporation

5F., Building A, No. 209, Sec.1, Nangang Rd., Nangang Dist., Taipei City 11568, Taiwan Tel: 886-2-2785-7888; Fax: 886-2-2652-5835

Date: February 19, 2025

Request for Modular Approval for FCC ID: QYLFN990B

The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §\$ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) The module must demonstrate compliance in a stand-alone configuration The module was tested on evaluation board, and electronic display The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee The module contains a metal shield which covers all RF components and circuitry. The shield is located on the top of the board next to antenna connector. See photo provided with this filing. The module has buffer modulation / data inputs. The module has buffer modulation / data inputs. The module has its own power supply regulation. The module dustion or its individual inputs. The module dustion or its individua	Item	Requirements	EUT
frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly 2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal 3. The module must contain power supply regulation on the module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) 5. The module must demonstrate compliance in a stand-alone configuration 6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display 7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee 8. The module must comply with RF exposure The module complies with all applicable RF		•	
components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly 2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal 3. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) 5. The module must demonstrate compliance in a stand-alone configuration 6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display 7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee 8. The module must comply with RF exposure The module complies with all applicable RF	1.		
located external to the shield, but must be on the module assembly 2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal 3. The module must contain power supply regulation on the module 4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) 5. The module must demonstrate compliance in a stand-alone configuration 6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display 7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee 8. The module must comply with RF exposure The module complies with all applicable RF			· · · · · · · · · · · · · · · · · · ·
on the module assembly 2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal 3. The module must contain power supply regulation on the module 4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §5 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) 5. The module must demonstrate compliance in a stand-alone configuration 6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display 7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee 8. The module must comply with RF exposure The module has buffer modulation / data inputs. The module has transmits own power supply regulation. The module has its own power supply regulation.			•
 The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal The module must contain power supply regulation on the module The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) The module must demonstrate compliance in a stand-alone configuration The module must be labeled with its permanently affixed FCC ID label, or use an electronic display The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee The module complies with all applicable RF The module must comply with RF exposure The module complies with all applicable RF 		·	connector.
