  2. This product can not be charged with a charger which output voltage is higher than 5V, otherwise it will burn out the headset by over-voltage;
- Frequently Asked Questions**
- Why do I hear static noise on my headset?
- "Wireless devices are susceptible to interference that may affect audio quality and result in static. To avoid blocking the Bluetooth signal, follow these guidelines:

1. Make sure the distance between your headset and the paired device does not exceed 10 m.
  2. Make sure there is a direct line of sight between your headset and phone. Avoid placing objects that can block radio signals between paired devices. (include walls, doors and windows.)
  3. Avoid environments where computers/microwave ovens/high concentrations of Wi-Fi are present
  4. Keep your headset and mobile phone on the same side of your body.
  5. Avoid placing your mobile phone in a back pocket.
- \*Note: Low battery capacity in your headset and mobile phone may affect the Bluetooth range.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux  
CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1) L'appareil ne doit pas produire de brouillage;
- 2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

## **FCC Requirement**

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
