

Test Data Reuse Letter

This application is intended to reuse previous test data (from FCC ID: 2ALJ3AP35X, certified on 08/06/2021 of initial application), since the two models of products are hardware-wise identical and only the following changes have been made:

AP351 (FCC ID: 2ALJ3AP35X), AP451 (FCC ID: 2ALJ3AP45X), use identical internal printed circuit board layouts, have a common design and components. The difference is enable Wi-Fi 6E via software and change 5G Wi-Fi High bands to Full bands.

So, we have performed all testing items of Wi-Fi 6E and 5G Wi-Fi Low bands configurations and reused the test data of BLE/2.4G Wi-Fi/5G Wi-Fi High Bands/Wi-Fi Scan.

Also, both the referenced application and this new application are all subject to the same FCC rule and there is no new rule update for related rules. Accordingly, we believe that the reuse data from previous certified filing is justifiable. Thank you for your attention and please feel free to contact us, if you should have any questions.

Sincerely yours,

Lawrence Lu / Chief Compliance Engineer
