

Zhongshan HongWei Motor Manufacturing Co., Ltd.

[2024/11/1]

AC POWER CEILING FAN REMOTE CONTROL , MODEL : GW-TR004A1 / GW-TR004A2 / GW-TR004A3 / GW-TR004A4 / GW-TR004A5

The internal PCBA of the transmitter for the 5 types of button panels is the same (the transmitter emits the same signal), and the symbol function changes of the panel buttons are achieved by the function changes of the receiver receiving the signal, independent of the transmitter. The PCB design of the transmitter covers every button function, and the data sent is fixed. The actual functional changes are affected by the receiver on the entire machine, which will adjust data processing according to different functional requirements.

Sincerely,
