# Multi-Function Wireless Charger

WIRELESS CHARGING | ALARM CLOCK | LAMP | STORAGE CHARGING BASE

PRODUCT INSTRUCTIONS

S32

Thank you so much for choosing our product,
please read the manual carefully before using the product.

85.00 mm

110.00 mm

正面

FEATURES

- Simple and exquisite shape.
- LED mood lamp.
- Alarm clock.
- Wireless fast charger.
- Charging distance ≤ 8mm.

APPERANCE FEATURES

① Mobile phone wireless charging area
② Screen display area
③ PP lampshade
④ Light adjustment touch switch
⑤ Mobile phone wired charging interface
⑥ Smart watch charging area
⑦ Function button
⑧ Type-C/USB output port
⑨ Charging indicator
⑩ Type-C input port
⑪ Storage box Type-C input port

OPERATION METHOD

1. Connect the USB port of the USB data cable to the power adapter and the Type-C portproduct.
2. After the product is powered on, the product indicator light is always red, and the required wireless charging devicePlace it in the charging indication area of this product and enter the charging state.

3. The product can also be used with an external cable. After the product is powered on, connect Type-C/USB to the product.Connect the other port to the mobile phone and enter the charging state.
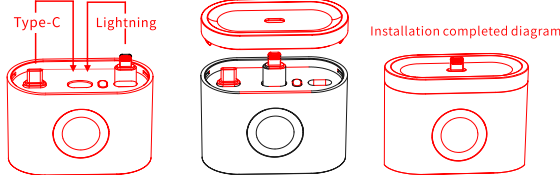

Type-C output interface | USB output interface | Lightning / Type-C

STORAGE BOX INSTALLATION

1. The charging storage box has two interfaces, namely Type-C interface and Lightning interface.

Type-C | Lightning
Place the required interface at the middle interfaceClose the lid.
Installation completed diagram

2. The storage box can be charged separately and is portable for outdoor use. Connect the USB data cable to the USB portConnect the power adapter and the Type-C port to the product. Connect the required wireless charging equipmentPlace it in the charging indication area of this product and enter the charging state.
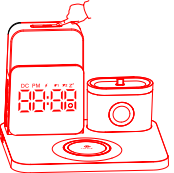

NIGHT LIGHT FUNCTION

- Click to turn on the light to switch warm white/cool white/positive white/off.
- Turn on the lights in sequence.
- In any color temperature light mode, long touch to adjust the light brightness.

APPLICABLE DEVICE

This product supports fast wireless charging, which complies with the QI wireless charging standard; it realizes short-distance wireless power transmission through magnetic induction. This device supports all wireless charging devices that meet the QI standard. When using a 5V output adapter , Wireless charging supports 5W load. When using an adapter that meets QC2.0 and above standards,the wireless charging supports 10W load; Support overcharge protection (9V) and overcurrent protection (2A).

ATTENTION POINTS

- Do not use or store the product in direct sunlight or high temperature places for a long time.
- Do not charge in places too close to magnetic cards, magnetic recording media, and precision instruments.
- Do not disassemble or modify this product.
- Do not touch the AC adapter with wet hands.
- Keep this product away from water or other liquids.
- If you want to clean the product, please disconnect the power.
- Product working environment temperature range: -20~45℃.

FCC statement:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2)this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement
The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.

ISED statement:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licenceexempt RSS(s). Operation is subject to the following two conditions:
1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.
Cet appareil contient des émetteurs/récepteurs exempts de licence qui sont conformes aux RSS sans licence d'Innovation, Sciences et Développement économique Canada.
L'exploitation est soumise aux deux conditions suivantes :
1. Cet appareil ne doit pas provoquer d'interférences.
2. Cet appareil doit accepter toute interférence, y compris les interférences qui peut entraîner un fonctionnement indésirable de l'appareil.
This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment.
During the operation of device a distance of 10 cm surrounding the device and 10 cm above the top surface of the device must be respected.

Cet équipement est conforme Canada limites d'exposition aux radiations

dans un environnement non contrôlé. au cours de l'opération de l'appareil sur

une distance de 10 cm autour de l'appareil et de 10 cm au - dessus de la

surface supérieure de l'appareil doit être respecté.
