

60mm

Smart Tag

Specification	
Model	AS01/Tag 01
Size	36.5x36.5x10.5 (mm) (1.43x1.43x0.41 inch)
Weight	1g (0.035 oz)
Case	CS0202
Working voltage	DC 3V
Working current	Standby current ≤ 100nA; Maximum Current 10 mA
Interface	BLE 5.1
Address	4800000000000000
Bluetooth module	BT42
Storage	Battery (FR 3020 100mAh)
Working temperature	-10°C to 60°C (23°F to 118°F)
Working humidity	85%RH (non-condensing)

Quick instructions

1 Start up the equipment and enter the pairing state
Click the product once and the product is started and prompted to enter the pairing state.

2 Pair the device

Open Apple's Home app on your iPhone. When prompted, tap "Find My" to get started. Tap "Add New Item" to add the Smart Tag. Tap "Name" to name the device. Tap "Add" to complete the pairing process.

3.Enable the Lost Mode mode

Open Apple's Home app on your iPhone. When prompted, tap "Find My" to get started. Tap "Add New Item" to add the Smart Tag. Tap "Name" to name the device. Tap "Add" to complete the pairing process.

Instructions for using the device keys

1 To enter the pairing state
Click the product once and the product is started and prompted to enter the pairing state.

2 The equipment reminds the pairing state
After adding the device to the Find My app, the device does not start alone and a pairing code is displayed. When prompted, tap "Pair" to complete the pairing process.

3.Reset the factory Settings
Hold the touch button for at least three seconds. This will clear the device's memory and return it to the factory settings.

4.Quick search
Tap the touch button once to quickly search for the device.

5.What is a "Find My" network? How to work?
The "Find My" network is a secure network that allows you to locate your devices and find people who have shared their location with you.

6.How to protect my privacy?
You can control who can see your location and who can see your contacts. You can also control who can see your device's location.

7.How to replace the battery for the equipment?
The battery is located on the back of the device. To replace it, you need to use a small screwdriver to open the back cover.

1. When the device is equipped from the outside

When the device is equipped from the outside, it will automatically connect to the Find My app on your iPhone. You can also use the device to find your iPhone.

2. How to prevent devices from being used for malicious tracking?
You can prevent devices from being used for malicious tracking by turning off the "Find My" network in the Settings app.

3. How to protect my privacy?
You can control who can see your location and who can see your contacts. You can also control who can see your device's location.

4. How to replace the battery for the equipment?
The battery is located on the back of the device. To replace it, you need to use a small screwdriver to open the back cover.

5.What is a "Find My" network? How to work?

The "Find My" network is a secure network that allows you to locate your devices and find people who have shared their location with you.

6.How to protect my privacy?
You can control who can see your location and who can see your contacts. You can also control who can see your device's location.

7.How to replace the battery for the equipment?
The battery is located on the back of the device. To replace it, you need to use a small screwdriver to open the back cover.
