Dear Errol / Kwok:

Submitted herewith, on behalf of Sanyo Electric Co. Ltd., is an amendment in response to your e-mail dated April 14, 2000 requesting additional information for the subject application.

1. Attached is the remeasured ERP data in AMPS mode for SCP-45H phone. Please note that the remeasured ERP data is performed using substitution method.
2. Attached is the revised tune-up procedure with + 0.5dB tolerance for AMPS mode (25.0dBm + 0.5dB/- 0.5dB) (see attached amended tune-up procedure page 9). Please note that production units will be tested for conducted power measurements with the above tolerance before shipment to ensure the maximum power does not exceed this level (+25.5dBm).
3. Attached are the replotted SAR data plots with the correct ear reference point so that the peak SAR location is around the antenna when the antenna is in extended position.

We trust this information is sufficient to issue the grant asap. If you have any further questions, please do not hesitate to contact us. Thank you.

Sincerely,

  
\_\_\_\_\_
