Water drinking reminder: After the watch is connected to the APP, you can set the starting time, end time and intervals on the App.

Common Problems

1. I wonder if the Bluetooth connection successful?

Answer: Pulling down the status bar to check the status. If bluetooth icon in white color, means connection. If icon in grey color, means disconnection.

2. What should I do if the Bluetooth connection fails for many times?

Answer: Due to the lack of uniformity in the Bluetooth protocols of various mobile phone brands, sometimes the Bluetooth connection between the mobile phone and the watch may be unstable. You can turn off the mobile phone's Bluetooth and reconnect, or restore factory settings on watch and then connect again.

3. What should I do if I can't receive the message notification?

Answer: The watch only synchronizes the notification function of the mobile phone, such as incoming phone calls, QQ, WeChat message reminders, etc. Go to "Settings" "Application Management" on the mobile phone, find "Privilege Management", and open them all. Then entering "Notification Management", find "MTWEAR Pro" APP, and open all permissions. Open "MTWEAR Pro"- "Device" - "Message Push", enable the background operation permission, and enter the APP that chooses to synchronize information notifications, such as QQ, WeChat, etc.

Reminder: If the WeChat computer version is online at the same time, the mobile phone will not receive the notification. Some mobile phones also need to add "MTWEAR Pro APP" to the power saving white list to avoid being turned off by the mobile phone when the battery is low.

Warranty

1. When this product is in normal use, if there are product quality problems caused by manufacturing, materials, design, etc., from the date of purchase, the PCB will be guaranteed for free within one year, and the battery and charger will be guaranteed for half a year.
