(4) M *	 (3) Country code selection capability to end user- ☐ Yes, ☐ No If yes, pls explain how it was implemented: (pls also help to provide detail of options for each country selection) (4) Meet Part 15.202 requirement - ☐ Yes, ☐ No, * A client device is defined as a device operating in a mode in which the transmissions of the device are under control of the master. A device in client mode is not able to initiate a network. 						
so op th in	5) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes can't be modified by end user or an installer. Apply No Apply						
(1	f apply, pls help to p	rovide explanation	n on it was impleme	ent, and how softw	are was controlled)).
