About This Manual

The PM-521 User's Manual provides instruction for qualified personnel to follow when setting up a new PM-521 device.

This document is intended for use by qualified personnel to compliment the training and expertise, not to replace it.

Related Information

Current information and manuals are available for download at the following website:

<http://www.ruggon.com>

Conventions

Bolded or underlined text is used to emphasize the designated information.

A Note is used to provide additional information for the device or settings.

A Caution is used to warn against potential hazards or to caution against unsafe practices.

A Warning is used to identify immediate hazards for property damage, injury or death.

Basic Safety Guidelines

The following safety guidelines are intended to help protect the user from injury and prevent damage to the hardware.

- Do not place anything on the AC adapters power cable and make sure the cable is not located where it can be tripped over or stepped on.
- Do not cover the AC adaptor as it reduces the cooling
- Do not use the AC adapter while it is inside the carrying case.
- Use only the AC adapter, power cord, and batteries that are approved for use with the device. Use of another type of battery or AC adapter may cause risk of fire or explosion.
- If you use an extension cable with the AC adapter, ensure that the total ampere rating of all products plugged in to the extension cable does not exceed the ampere rating of the extension cable.
- If the device is moved between environments with very different temperature and/ or humidity ranges, condensation may form on or within the device. Avoid damaging the device by allowing sufficient time for the moisture to evaporate before using the device.
- When disconnecting cables, pull on the connector or on its strain relief loop, not on the cable itself. When pulling out or plugging in the connector, keep it evenly aligned to prevent bending the connector pins.

Intended Use

The PM-521 rugged tablet is equipped with multi-functional terminals for stationary and mobile applications in industrial environments such as logistics, warehousing, fleet management, manufacturing and the automotive industry.

Read the safety guidelines thoroughly before starting any servicing on the device. Read the guidelines before powering up the device, and keep this document for later use.

The operator is solely responsible for any damage resulting from unauthorized modifications to the device.

Unintended Application Use

The device is not designed for use in life-support systems or critical safety/security systems where system malfunction can lead to the direct or indirect endangerment of human life. The operator is fully responsible for using the device in these situations.

Maintenance and Operation Overview

The PM-521 is designed and manufactured according to strict controls and following the stated safety regulations. The following list identifies incorrect operating uses of the PM-521. Incorrect use of the PM-521 can lead to hardware damage, safety issues and possible risk to personnel health:

- The PM-521 is under operation by untrained personnel;
- The PM-521 is not maintained as recommended;
- The PM-521 is not used as intended.

Safety

To prevent injury and damage, read the following safety guidelines prior to operating the device. The manufacturer assumes no liability for any and all damages arising from misuse or noncompliance with these guidelines.

Electrical Hazards

Cleaning/Servicing: Power Off the PM-521

- Disconnect the PM-521 from power before cleaning or servicing it.

Power Adapter

Contact an authorized service personnel for repairs to the power pack. In the event of a blown fuse after replacing the fuse, contact an authorized service personnel to avoid electrical shock.

Use only Supplied Power Cables

RuggON power cables meet industrial requirements for low-temperature flexibility, UV resistance, and oil resistance. Use only supplied power cables from RuggON.

If other power cables are used, the following may apply:

- The operator is solely responsible for the resulting damage;
- All RuggON warranties are void.

Environmental Hazards

Do not use the PM-521 in locations near/with flammable gases or vapor.

The use of electrical equipment in explosive environments can be dangerous.

- Turn off the device when near a gas station, fuel depot, chemical plant or a place where blasting operations take place.

Environmental

Ambient Temperature

The PM-521 operates on the basis of a passive cooling concept which internal waste heat is released via the housing surface and requires fresh airflow in the environment.

- Operating the PM-521 with no fresh cooling air may cause overheating and damage to the device.
- The operating environment should not be enclosed to prevent the cool air being heated by the heat waste from the device.

Connecting and Disconnecting External Devices

To prevent the considerable damage, the PM-521 and the external device should be disconnected from power when connecting/disconnecting excluding USB devices.

Only Use Authorized Accessories

Only use the supplied cables, power packs and other accessories that have been tested and approved by RuggON. Contact your local distributor for further information.

Radio Transmissions

Permitted Transmission Power

Follow the national regulations for the maximum permitted transmission power.

The operator is solely responsible for this type of operation.

Radio Frequency Limited Locations

Considering the radio frequency limitation in hospitals and aircraft, the PM-521 can only be installed with permission.

Industrial computers may affect the function of implanted medical devices such as pacemakers and may cause malfunction.

Cleaning and Servicing

- Disconnect the PM-521 from power before cleaning or servicing.
- Never clean the PM-521 with compressed air, a pressure washer or a vacuum cleaner.
- If necessary, clean the housing of the PM-521 with a damp cloth.
- Clean the touch-screen with a nonabrasive cloth.

Regulatory and Certification

FCC

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio / TV technician for help.

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

This device is operation in 5.15 - 5.25GHz frequency range, then restricted in indoor use only, Outdoor operations in the 5.15 - 5.25GHz is prohibit.

This device is slave equipment; the device is not radar detection and not ad-hoc operation in the DFS band.

Labeling Requirements

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information (SAR)

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the EUT transmitting at the specified power level in different channels.

The highest SAR value for the device as reported to the FCC is **1.19** W/kg when placed next to the body.

CE Marking

This product has passed the CE test for environmental specifications when shielded cables are used for external wiring. We recommend the use of shielded cables. Please contact your local representative for ordering information.

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

R&TTE

This device complies with the essential requirements of the R&TTE Directive 1999/5/EC.

This device is classified as class 2 in Article 1(2) of Decision 2000/299/EC due to its capability of operating WLAN in the band 5.15 to 5.35 GHz.

CB

This device complies with

IEC 60950-1:2005+A1:2009+A2:2013

EN 60950-1:2006+A11:2009+A1:2010+A12:2011+A2:2013

Lithium Battery Safety Statement

Lithium battery inside. Danger of explosion if battery is incorrectly replaced. Replace only with same or equivalent type recommended by battery manufacturer.

Chapter 1. Introduction

The PM-521 is a rugged device equipped with 802.11, Bluetooth and GNSS for wireless data communications.

The PM-521 is a rugged 10.1" tablet computer capable of 1920 x 1200 resolution.

The PM-521 supports the following operating systems:

- Windows® Embedded 8.1 Industry 64bits
- Windows® Embedded Standard 7 64bits
- Windows® 7 Professional 64bits
- Windows® Embedded Standard 8 64bits
- Android™ 4.4 (by request)

About This Guide

The PM-521 User Manual provides instruction for qualified personnel to use as a guide for setup of the device. This document is not intended to replace the training and expertise of the end-user.

Unpacking the Device

Before you begin the installation or configuration process make sure to inspect all components and accessories. Contact your representative if there are any missing or damaged items. See "Contacting RuggON" on page 50.

Technical Specifications

Table 1. Technical Specifications

Item	Description
Display	10.1-inch LED Backlight, 1920 (W) x 1200 (H) WUXGA
Touch screen	10-point capacitive touch screen
Brightness	1000 nits
CPU	Intel Dual Core Atom E3827 1.75 GHz (Bay Trail)
Operating System (Optional)	■ Windows® Embedded 8.1 Industry 64bits ■ Windows® Embedded Standard 7 64bits ■ Windows® 7 Professional 64bits ■ Windows® Embedded Standard 8 64bits ■ Android™ 4.4 (by request)
RAM	DDR3L@1333 MHz 4 GB RAM (8 GB by request)
Storage	mSATA SSD 120 GB (optional: 240 GB)
Battery	■ Standard hot swappable battery: 10.8V, 4500mAh, Li-polymer ■ Extended hot swappable battery: 10.8V, 9000mAh, Li-polymer (optional)
Power Supply	AC 100V ~ 240V, 50~60Hz input; 19VDC@3.42A, 65W

Item	Description
Dimensions (W x H x L)	280 mm (11") x 23 mm (0.9") x 195 mm (7.7")
Weight	1.33 kg (2.93 lbs)
Wireless	
WLAN	Wi-Fi IEEE 802.11 a/b/g/n/ac
Bluetooth	Bluetooth V4.0
WWAN (Optional)	Optional for 3.5G or 4G LTE
Sensor	
Sensor	Gyroscope, G sensor, E-compass, Light sensor
I/O	
Docking Connector	12-pin
DC-IN Jack	x1
Micro SIM Card Slot	x1
MicroSD Slot	x1
Audio Jack	x1; headphone / microphone combo
USB 3.0	x1; type A
USB 2.0	x1; type A
RS-232	x1
Micro HDMI	x1
Ethernet	x1
Security	
TPM	TPM 1.2
BIOS On/Off for I/Os	Yes
Data Collection	
Camera	■ Front: 2.0 Mega-Pixels camera ■ Rear: 5.0 Mega-Pixels camera with LED auxiliary light and Auto-focus
GNSS	Yes
NFC	Optional
Barcode Reader	Optional
Magnetic Stripe Reader	Optional
Smart Card Reader	Optional

Item	Description
Rugged Specifications	
Drop	153 cm (5 feet), 26 drops on plywood
MIL-STD 810G	■ Vibration (MIL-STD-810G Method 514.6 Category 4, Fig 514.6C-1, Fig 514.6C-2, Fig 514.6C-3) ■ Drop (MIL-STD-810G Method 516.6 Procedure IV) ■ Mechanical shock (MIL-STD-810G Method 516.6 Procedure I, Procedure V) ■ Operation and storage temperature (MIL-STD-810G Method 501.5 and 502.5) ■ Humidity MIL-STD-810G Method 507.5 Humidity Procedure II Aggravated Cycles (Fig 507.5-7)
IP rating	IP65
Operating Temperature Range	-20°C (-4°F) to 50°C (122°F)
Storage Temperature Range	-30°C (-22°F) to 70°C (158°F)
Humidity	5-95% without condensation

PM-521 Configuration Options

The following options are available for the PM-521:

- NFC module
- Barcode reader
- Smart card reader
- High capacity battery
- 3.5G or 4G LTE

Parts List

The PM-521 is shipped with the following items. All other accessories are sold and ordered separately. For help, contact your local RuggON sales representative. See “*Contacting RuggON*” on page 50.

PM-521

Power Adapter

Stylus

2-Point Carrying Handle

2-Point Shoulder Strap

4-Point Handstrap

Hitch D-rings

3	Barcode reader	For installing a barcode reader (Optional).
4	NFC sensing area	For detecting NFC devices. (Optional)
5	Securing holes	Secure the bumpers and the D-rings for the handstrap and shoulder strap.
6	Expansion bay	Remove the cover to find the expansion accessory connector.
7	Stylus holder	Place stylus here.

Dimensions

The following image lists the device dimensions without add-ons (mm/inches).

Figure 6. Front View Dimensions

Figure 7. Side View Dimensions

Touch Screen Features

Always use the point of the stylus for clicking or making strokes on the touch screen.

Never use an actual pen, pencil, or sharp/abrasive object on the touch screen.

The stylus is used as if it were a pen or pencil. Touch the screen with the tip of the stylus then remove the stylus from the screen.

After each use, replace the stylus in the stylus holder for proper care and to preserve the life of the stylus.

Using a stylus is similar to moving the mouse pointer then left-clicking icons on a desktop computer screen.

The following actions are available through the use of the stylus:

- Open applications
- Choose commands in menu
- Select options in dialog box or drop-down menu
- Drag the scroll bar
- Drag across the text to select content
- Place the cursor in a text box before typing

A right click is generated by tapping the mouse icon in the system tray. After tapping, the mouse icon highlights the right button of the icon in red. The next touch screen tap is treated as a right click. The mouse icon returns to the left button highlighted in red so subsequent taps are treated as left clicks.

A stylus replacement kit is available.

To prevent damage or malfunction, always dry the touch screen when wet.

Chapter 2. Getting Started

This section provides an outline of the steps necessary to setup a new PM-521. A detailed guide follows the listed items, see as follows.

For additional technical assistance, contact your RuggON representative. See “*Contacting RuggON*” on page 50.

It is recommended to installing or remove accessories on a clean, well-lit work surface. To protect yourself and the device from electrostatic discharge, wear anti-static wrist straps or place the device on an anti-static mat.

First Time Use

1. Open the left I/O compartment cover. See “*Opening the I/O Compartment Cover*” on page 25.
2. Switch the switch to the ON position.

Figure 8. Switching the Battery Switch

3. Close the left I/O compartment cover. See “*Closing the I/O Compartment Cover*” on page 26.

Charging the Battery

When you use the AC adapter to connect your PM-521 to a power outlet, the standard and external (optional) battery will automatically begin to recharge.

While the battery is charging, the power LED will be active. When the battery is fully charged, the power LED is lit a solid green.

1. Flip open the DC-IN cover to expose the DC-IN jack.

Figure 9. Opening the DC-IN Cover

2. Connect the AC adapter to the DC-IN port.

Figure 10. Connecting the AC Adapter

After charging the battery, disconnect the AC adapter and close the DC-IN cover.

1. Insert one end of the cover first and angle the cover to seat it in place.
2. Push in the cover to seal the DC-IN compartment.

Figure 11. Closing the DC-IN Cover

The DC-IN cover must be inserted correctly to prevent internal damage to the device.

Powering the Device On and Off

Powering On the Device

Only power on the PM-521 after connecting all of the peripherals and cabling.

1. Press and hold the power button until the screen lights. The device runs through the start up sequence and powers up.

Figure 12. Power On the PM-521

Powering Off the Device

- Start screen:
Tap  > **Shut down**.
- Desktop screen:
 1. Tap and hold  at the bottom left corner of the Desktop screen.
 2. Tap **Shut down or sign out** > **Shut down**.
- Both Start screen and Desktop screen:
 1. Display charm bar and tap **Settings**.
 2. Tap **Power** > **Shut down**.

Installing the Micro SIM Card

The device includes a micro SIM card slot for cellular and wireless connection. Only a micro SIM card is supported in the slot.

Check with your network or cellular service provider for availability and cost rates.

1. Power off the PM-521. See “*Powering Off the Device*” on page 20.
2. Open the left I/O compartment cover. See “*Opening the I/O Compartment Cover*” on page 25.
3. Locate the micro SIM slot in the left I/O parts.

Left view

Figure 13. Left View: Locating the Micro SIM Slot

4. Take the micro SIM card from its packaging.
5. The micro SIM card has a corner missing. Align the SIM card with the slot making sure that the corners match.
6. Insert the micro SIM card and press it in until an audible click sounds.

Figure 14. Installing the Micro SIM Card

7. Close the left I/O compartment cover. See “Closing the I/O Compartment Cover” on page 26.

Removing the Micro SIM Card

1. Power off the PM-521. See “Powering Off the Device” on page 20.
2. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
3. Locate the micro SIM slot in the left I/O parts.

Left view

Figure 15. Left View: Locating the Micro SIM Slot

4. Press the micro SIM card in and release it. The card springs out.
5. Grasp the micro SIM card and remove it from the slot.

Figure 16. Removing the Micro SIM Card

6. Close the left I/O compartment cover. See “Closing the I/O Compartment Cover” on page 26.

Installing the MicroSD Card

The device supports microSD card for easier data storage.

1. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Locate the microSD slot in the left I/O parts.

Left view

Figure 17. Left View: Locating the MicroSD Slot

3. The microSD card has a beveled edge. Align the microSD card with the slot making sure that the corners match.
4. Insert the microSD card and press it in until an audible click sounds.

Figure 18. Installing the MicroSD Card

5. Close the left I/O compartment cover. See “Closing the I/O Compartment Cover” on page 26.

Removing the MicroSD Card

1. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Locate the microSD slot in the left I/O parts.

Left view

Figure 19. Left View: Locating the MicroSD Slot

3. Press the microSD card in and release it. The card springs out.
4. Grasp the microSD card and remove it from the slot.

Figure 20. Removing the MicroSD Card

5. Close the left I/O compartment cover. See “Closing the I/O Compartment Cover” on page 26.

Using the Stylus

Following the information below when using a stylus:

- Use only the included stylus to touch the screen. Do not place any objects on its surface and do not press down strongly with sharp-pointed or hard objects that may leave marks (e.g., nails, pencils and ball point pens).
- Use the stylus only for touching the screen. Using it for any other purpose may damage the stylus and result in scratches on the screen.
- The pointer cannot follow the stylus movement if you move the stylus too quickly.

To make a selection, tap the screen once with the stylus. To double-click, tap twice without pausing. To do a right-click, tap the screen once and hold the tip of the stylus on the screen, the right-click icon appears.

Removing the Protective Film from the Display

The front display of the PM-521 is protected during transport by a transparent film. This film should remain on the front display during assembly to avoid damage to the front display surface.

Only remove the film once all of the assembly work has been completed.

Figure 21. Removing the Protective Film

Chapter 3. Operation

Opening the I/O Compartment Cover

1. Place the device display side down on a clean work surface.
2. Locate the I/O compartment cover.

Figure 22. Side View: Locating the I/O Compartment Cover

3. Unlock the latch. (Only available for the left I/O compartment cover)

Figure 23. Unlocking the Latch

4. Pull out the I/O compartment cover.

Figure 24. Opening the I/O Compartment Cover

Closing the I/O Compartment Cover

1. Place the device display side down on a clean work surface.
2. Locate the I/O compartment cover.

Figure 25. Side View: Locating the I/O Compartment Cover

3. Flip the I/O compartment cover and install.

Figure 26. Installing the I/O Compartment Cover

4. Lock the latch. (Only available for the left I/O compartment cover)

Figure 27. Locking the Latch

The I/O compartment cover must be inserted correctly to prevent internal damage to the device.

Connecting to External Cabling

To prevent damage to the device, connect all cabling and accessories before powering up the device.

Connect USB Cabling

The PM-521 have one USB 3.0 and one USB 2.0 ports for connecting USB devices, such as a digital camera, scanner, printer, modem, and mouse. The USB ports support USB 2.0 or USB 3.0 devices.

1. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Connect to USB device via USB cable.

Figure 28. Connect USB 2.0 Cabling

Figure 29. Connect USB 3.0 Cabling

Connect Ethernet Cabling

The PM-521 provide have a Ethernet port for connecting Ethernet.

Use a shielded cable is required to maintain emissions and susceptibility compliance.

1. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Connect LAN cable to Ethernet port on the PM-521.

Figure 30. Connect Ethernet cabling

Connect Audio Cabling

For higher audio quality, you can send sound through external audio devices such as speakers, headphones, or earphone using audio connector.

1. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Connect the audio cable.

Figure 31. Connect Audio Cabling

Connect Micro HDMI Cabling

Connect to HDMI devices via micro HDMI cable.

1. Open the left I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Connect micro HDMI cable to micro HDMI port on the PM-521.

Figure 32. Connect Micro HDMI Cabling

Connect RS-232 Cabling

Connect to RS-232 devices via RS-232 cable.

1. Open the right I/O compartment cover. See “Opening the I/O Compartment Cover” on page 25.
2. Align the RS-232 cable with the port in the device and connect it.
3. Turn the locking screws on the cable to secure it to the device.

Figure 33. Connect RS-232 Cabling

Handstrap, Carrying Handle and Shoulder Strap

The PM-521 is equipped with a handstrap, a carrying handle and a shoulder strap for convenience and choice. Select the accessory that is right for your needs.

The handstrap can be installed with either the shoulder strap or the carrying handle. However, the handle and shoulder strap can not be installed together due to space constraints.

For more information, see “*Connecting the Handstrap*” on page 30, “*Connecting the Carrying Handle*” on page 32 and “*Connecting the Carrying Handle*” on page 32.

Connecting the Handstrap

1. Remove the screws securing the bumpers.

Figure 34. Removing the Screws

2. Install the D-rings.

Make sure the D-rings are tightly secured before installing the handstrap.

Figure 35. Installing the D-rings

3. Connect the handstrap on the D-rings.

When the handstrap is installed, the stylus can be placed under the strap.

Figure 36. Connecting the Handstrap

Removing the Handstrap

1. Unlock the handstrap from the D-rings.

Installing the Standard Battery

The following instructions are for both standard and external batteries. The external battery is an optional component. Only use components specifically designed for this device. Contact your local representative for ordering information.

Make sure the power switch is switched to ON before installing the standard/external battery. See “First Time Use” on page 18.

1. Place the device display side down on a clean work surface.
2. Locate the battery.

Figure 44. Rear View: Locating the Battery

3. Align the tabs on the battery with the slots on the chassis.
4. Angle the battery in place and set the tabs in the chassis slots.
5. Lower the raised end of the battery and press in place until an audible click is heard.

Figure 45. Installing the Battery

- Slide the locking switch on the top-left side to lock the battery.

Figure 46. Locking the Battery

Make sure the latch is securely locked to prevent the battery from falling.

Removing the Standard Battery

- Place the device display side down on a clean work surface.
- Locate the battery.

Figure 47. Rear View: Locating the Battery

- Slide the locking switch on the top-left side to the unlock position.

Figure 48. Unlock the Battery

- Press and hold the release button as shown in the image to release the battery.

5. Hold the battery and angle the left side up to remove.

Connecting to a Wireless Network

Before you can make use of the PM-521 wireless functions, you need to connect to a network. The following is a set of procedures for connecting to a wireless network.

1. Before beginning, make sure your Wi-Fi setting is enabled and you are within range of a wireless network. If your Wi-Fi setting is disabled, proceed to step 2.
 - Look at the Network icon located at the right side of the taskbar. If the icon displays an X in a red circle, you are not within range of a wireless network. Move to a different spot until the Wi-Fi icon changes status indicating availability to a wireless network.
2. From any screen, open the Charms bar by sliding your finger inward from the screen's right edge. The Charms bar displays along the screen's right side.
3. In the Charms bar, tap **Settings** to open the **Settings** menu.
4. In **Settings**, tap the Network icon to display the Networks connection settings.
5. The Wi-Fi menu displays. By default, the Wi-Fi menu is set to Off. Tap the bar next to Off to toggle Wi-Fi to On. This enables the Wi-Fi option.
6. Once W-Fi is enabled a listing of all available wireless networks displays. The wireless networks with the strongest signal are atop the list.
7. Select the network you want to connect to, and tap the **Connect** button. You can tap the **Connect Automatically** check box if you connect to this network frequently. If you connect to the network, you are finished with the process. The network is considered an Open unsecured network, no password is required.
8. If a password is required, type the password in the **Enter the network security key** field. Alternatively, you can also push the WPS button on your router to begin the security handshake.
9. Tap **Next** to finish the connection process.

You have successfully connected to a wireless network.
