# Antenna Specification

## 2.4/5.8G PIFA Antenna

PN: UB01NP2D1087A

2.4/5.8GHz Dual-band antenna

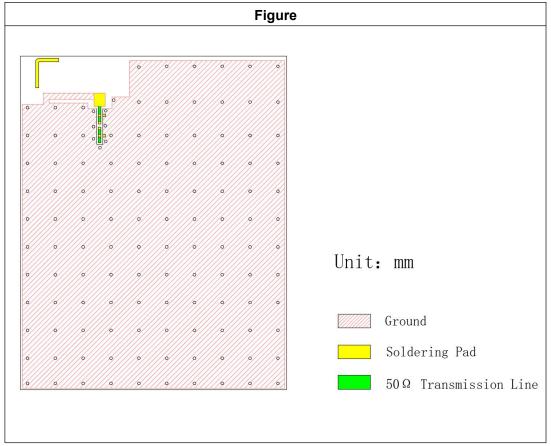

## 东莞市优比电子有限公司

Dongguan Youbi Electronics Co., Ltd

#### Electrical Characteristics

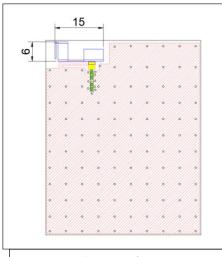

| UB01NP2D1087A     | Specification |  |
|-------------------|---------------|--|
| Working Frequency | 2400-2500MHz  |  |
|                   | 5150-5850MHz  |  |
| Band Width        | >100MHz       |  |
| Impedance         | 50 Ω          |  |
| Gain(dBi)         | 2             |  |
| VSWR              | <2            |  |
| Operation         | -40℃~+85℃     |  |
| Temperature       |               |  |
| Power Capacity    | 3W            |  |

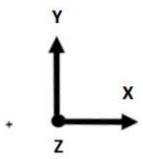

## Antenna pads and alignment design

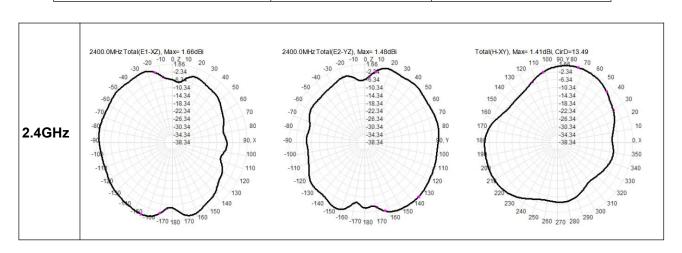

## Efficiency and radiation maps

The performance such as efficiency, radiation pattern, gain, etc. are obtained based on the test board design. The specification data of the antenna is based on the test PCB size and the test orientation shown in the figure below. The following data were tested in the ETS 3D microwave darkroom.

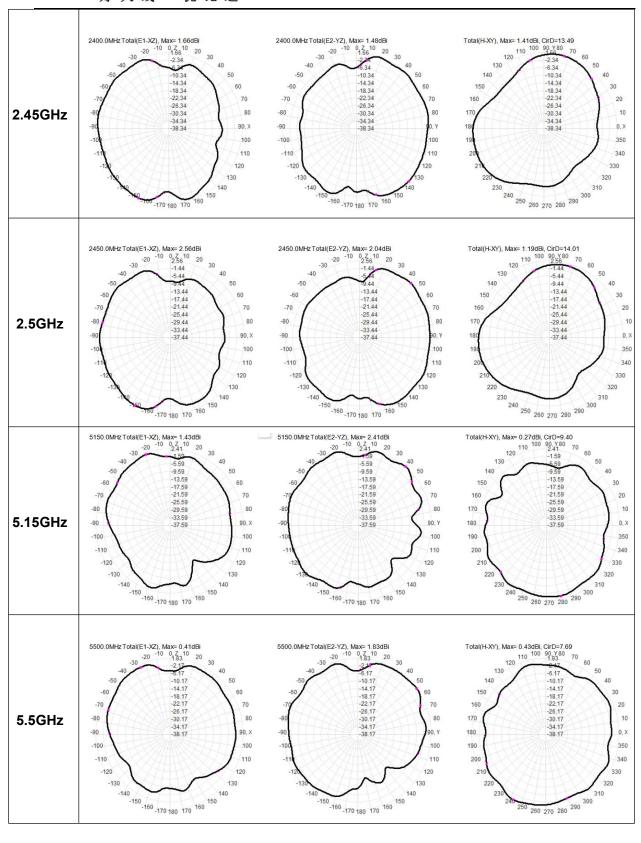

| Gain and efficiency                |                |                 |
|------------------------------------|----------------|-----------------|
|                                    | 2.4G-2.5GHz    | 5.15G-5.85GHz   |
| Peak Gain                          | 2.7dBi         | 2.59dBi         |
| Average Gain across the band       | 2.33dBi        | 2.24dBi         |
| Gain Range across the band         | 2.07dBi~2.7dBi | 1.75dBi~2.59dBi |
| Peak Efficiency                    | 71.18%         | 66.78%          |
| Average Efficiency across the band | 69.36%         | 63.64%          |
| Efficiency Range across the band   | 68.06%~71.18%  | 61.01%~66.78%   |

### Storage Environment

The following conditions should be met when storing the product:

Temperature :  $-10^{\circ}$ C $^{\sim}$ +40 $^{\circ}$ C

Humidity: 30% to 70% relative humidity

The location where the product is placed should not be exposed to corrosive gases, such as sulfur. Chlorine or acid may cause oxidation of product electrodes resulting in poor solderability.

The products should be placed in the tool box and avoid the influence of moisture and dust. Products should be stored in a warehouse and protected from heat, vibration and direct sunlight.

The products should be stored under airtight conditions.
