3. About Headphone's battery

- The device has an internal non–user-replaceable rechargeable lithium battery.
- For the first time use the device, let it charging for about 1 ~ 2 hours or until the [**Status LED**] indicator light from solid red turned to light off.
- The lithium battery of electronic devices is sensitive to long periods of inactivity. It is important to recharge it at least once a month to keep it functioning properly.

4. Terminals for charge and upload music

Important: Headphone is equipped with terminals which let you connect for charge and upload music files. To avoid performance matter, make sure the headphone's terminals and terminals plug of USB cable are completely dry and without dirty before to use for connection.

To charge:

Note: The headphone will shut-down other operating function automatically when you have connected Headphone with USB Power Adapter or Computer for charging or upload music functions.

- Use the Magnetic Terminals Plugs of the provided USB Charging Cable attach onto the Headphone's Terminals. And make sure that the magnetic terminals plug and terminals are proper placed. Please see illustrated for in below:

- Then, connect the Type-A plug of the USB Charging Cable to a USB port of your Computer or USB Power Adapter.
- The [**Status LED**] indicator will light solid red when the device is in charging.

- The **[Status LED]** indicator will light off from solid red when fully charged.
- Disconnect the USB Charging Cable from Headphone and Computer/Adapter once battery fully charged.

To upload music:

Note: Headphone is supports only for MP3, WAV, WMA, FLAC, APE audio file formats.

- Before you use the headphone **Local Player** function, connect the Headphone's terminals to a USB port of your Computer by the provided USB Charging Cable for upload the desired music onto it internal memory;
- Once connected, a hard-drive named **"BM111"** will be detected and appeared in "This PC" on your computer;
- On your Computer, use the **"Copy-and-Paste/Drag-and-drop"** functions to selects your desired audio file(s) or folder(s) drop them onto the root-directory of the BM111's drive.
- On a Windows computer, disconnect the BM111's drive by using the "Safely remove hardware" function.
- On a Mac computer, disconnect the BM111's drive by dragging the icon to the trash can.
- Disconnect the USB Charging Cable once upload music is completed.
- Or, leave it for charge the lithium battery.

5. How to wear

Note: If wearing your headphones not the right way could cause discomfort and degraded the listening performance.

- When wearing Bone Conduction Headphones, you have to make sure that they are rested on your cheekbones and the transducer pads are in front of your ears. Fit snugly, but not on your ear. Please see illustrated in below:

- This guarantees that they send the correct signal vibrations to the cheekbones in your ears.

6. ON / OFF

Power ON the headphone

- If not, the device will itself power OFF automatically when the battery is keeping low energy level in some time.
- In some low battery levels case, the device might not be turned the power On. If this happened, please recharging the battery at least 10 ~ 15 minutes, because the rechargeable battery has not enough energy for drive up the headphone.

14. Reset the Device

- In some circumstances, the device’s function may hang and need to reset. To reset the device;
- Long press the [►] button for 8 ~ 10 seconds, the device should reset and turn OFF automatically. After that, power ON the headphone for restart.

15. For Swimming

- I. The Headphone is IPX8 waterproof design; however, it’s not recommended you dive into a swimming pool more than 2 meter deeper while wearing the Headphone.
- II. The headphone can be placed in fresh water, tap water, swimming pool, sea water, etc., but not be placed it in soapy water, bath liquid, laundry detergent, high temperature or humidity.
- III. The charging pole-piece in the headphone is with anti-corrosion treatment. However, as seawater is highly corrosive, you are recommended to clean the headphone immediately when it is out of seawater.
- IV. If you need to use the provided seal earplugs, gently wear them in your ears.
- V. When earplugs fitted correctly, you should be able to notice while the headphone is not playing music that surrounding sounds will be significantly muted.
- VI. Be aware that there is a risk of damage to your ears or eardrums if strong pressure is applied to the earplugs or the earplugs are suddenly removed from your ears.
- VII. Remove the seal earplugs from your ears by gently twisting the stem, slowly allowing the seal the break without damaging or hurting the

ear and eardrums. The ear plugs must be thoroughly washed with soapy water, rinsed, and dried before reuse.

16. Cleaning after use in water

Important: Headphone is equipped with terminals let you connect without cover for charge and upload music files. Need to be completely dry before to use for connection.

- If perspiration, sand, or dirt gets on your Headphone, rinse it off with fresh water at room temperature or gently running by tap water immediately.
- When you wash the headphone, wash them by hand without using a brush, etc. Do not wash the headphone with hot water.
- Do not wash the Headphone in a washing machine or ultrasound bath, etc. Do not use detergent, chemicals, or wet wipes.
- After washing your Headphone, wipe away the water on them using a soft cloth, and then leave them in a well-ventilated shady place to dry.
- Do not dry the Headphone using hot air from a hair dryer. Doing so may cause deformation and deterioration of the water-resistant performance.
- Do not use the Headphone until they dry completely. Put a dry cloth under the Headphone and leave them at room temperature for about 2 or 3 hours.

17. Specification

Dimension	140mm x 98mm x 53mm (approx.)	
Weight	38g (approx..)	
Built-In Battery	Lithium 3.7V, 270mAh	
	Charging Time: 1.5 ~ 2 hours	
	Playing Time: 12 ~ 14hours @ 50% volume	
Terminals Connection	For Power: DC Input, 5V 500mA / 0.5A	
	For PC data: USB 2.0	
Bluetooth	Specification	V5.3
	Frequency Range	2.402GHz ~ 2.480GHz
	Supported Profile	A2DP (V1.3) AVRCP (V1.6)
	Connection Distance	Up to 10m (open area)
	TX Power	+ 8dBm (max.)
	Codec	SBC
Internal Storage	Capacity	32GB
Player Audio Playback	MP3	
	WMA	
	WAV	
	APE	
	FLAC	
Audio	Output Power	L: 200mW (8 Ohms) R: 200mW (8 Ohms)
	Freq. Responses	20Hz - 20000Hz
	SNR	> 70dB
Transducer	Bone Conduction	Impedance: 8 Ohms
	Sensitivity	70dB
Water Resistant	Waterproof: IPX8 (2 meters, 1 Hour)	
Operating Temperature	0 to 40°C	

18. Troubleshooting

Cannot power ON	<ul style="list-style-type: none"> Check whether battery have enough energy.
Cannot charge	<ul style="list-style-type: none"> Check whether Headphone's terminals and terminals plug are connected properly.
No sound	<ul style="list-style-type: none"> Check whether Volume is set to "minimum".
Play music files fail.	<ul style="list-style-type: none"> Corrupted WMA / MP3 may make a static noise and the sound may cut off. Make sure that the music files are not corrupted. Check whether music files are supported formats.

19. Disclaimer

Updates to Firmware and/or hardware components are made regularly. Therefore, some of the instruction, specifications and pictures in this documentation may differ slightly from your particular situation. All items described in this guide for illustration purposes only and may not apply to particular situation. No legal right or entitlements may be obtained from the description made in this manual.

20. CE Declaration of Conformity

21. FCC statement

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference

in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure condition without restriction
