

Item 1. Please provide appropriate antenna installation instructions and include antenna separation for RF exposure compliance.

From: CKC Laboratories, Inc.

Date: 2/27/04

Response: The base station does not have antenna installation instruction because of the numerous options for the application. No antenna is sold with this device.

CKC CS: This base station equipment does not operate under SMRS bands.

Item 2. Please provide a detailed description of the modulation system to be used including response characteristics: frequency, phase and amplitude of any filters provided and a description of the modulating wave train. According to the operational description a low pass audio filter "U10" is used prior to the VCO module. Please provide a response curve for this audio filter.

From: CKC Laboratories, Inc.

Date: 2/27/04

Response: A copy of the modem data sheet which has all the specifications of the data modulation has been uploaded. Also, with regard to U10, the part number is MAX 7401ESA and the data sheet, with response curves is also attached.

CKC CS:
