Simple Troubleshooting

Q: I press any button and no response

Problem Solution

A: The buttons will be locked automatically when there is no operation for 30 seconds, please press and

Q: App video can not be displayed normally

A: Please make sure that the environment where the device is located has a good network.

Q: App can't connect to the feeder

- A: 1) Please check if the Wi-Fi name and password are in Chinese or longer than 12 digits, Both 2.4ghz and 5ghz wifi are support.
- 2) Please restart your phone, close the non-system software that starts automatically on boot, turn on the Bluetooth and positioning of your phone, and try again to reconnect.

Q: The feeder is not allowed to dispense food or does not dispense food

A: Please check whether there is too much grain in the food bowl or it causes blockage of the grain channel, if so, please clean the grain channel and the food outlet in time; when using battery power supply, please check whether the battery is dead or not, and whether the battery is leaking liquid or not.

Q: Feeder display offline

A: Please check whether the feeder is more than 10 meters away from your home router (effective distance 10 meters); try not to separate walls in between, according to the characteristics of Wi-Fi, the Wi-Fi signal across the wall will drop sharply, and the connection will appear unstable, which will lead to the device being offline.

Q: No response to power on

A: Please make sure the power is plugged in. If the check is correct and the device still does not power on normally, please contact your dealer or customer service in time.
