Charging Case Indicator Light

First time using

1. Tear off the insulating film.

2. Put the earbuds into the charging case and close the lid to charge (the earbuds are in charging state).

3. Turn on the Bluetooth function on your phone and search for "DBK02" and connect it.

Warm notice

If the indicator of both earbuds keep flashing red and blue, check each earbud's power switch twice. Then the indicator of one earbud will flash red and blue alternately, another will go off. (in pairing mode)

If you want to switch the Bluetooth connection to another device, please disable the Bluetooth function in the previously connected device OR delete the pairing name of "DBK02" from the original device. Then the pairing name of "DBK02" can be searched in new device and connected successfully.

Restore factory setting

1. When the earbud is on with mobile phone unconnected, click the left and right power switch simultaneously four times quickly. The red and blue lights will be on for 2 seconds and then it will clear its memory and the earbuds will shut down.

2. Please delete all paired records on the phone and search again for "DBK02" on the bluetooth of mobile phone and reconnect.

Charging case indicator

State

Red light on: Earbuds in charging state
Red light on in battery state: "K" light on the charging case of Left earbud in battery state
Red light on in charging state: "K" light on the charging case of Right earbud in battery state
Red light on in full battery state: "K" light on the charging case of Left earbud in full battery state
Charging for earbuds: Displays the percentage of remaining power of charging case
Charging case in full battery state: Displays 100%

White light

"K" light on the charging case on: Right earbud in full battery state
"K" light on the charging case of Left earbud in battery state
"K" light on the charging case of Right earbud in battery state
"K" light on the charging case of Left earbud in full battery state
Charging case in full battery state: Displays 100%

Steps of charging for earbuds:

Put the earbud in the charging case, and the lid must be closed to charge it, and they will automatically turn on and disconnect when the charging case lid is closed.

Charging case: Please use a charger with an output voltage of DC5V/1A to charge the charging case. You can also use a computer USB or other USB interface charger to charge (Must choose a charger certified by a regular manufacturer)

Notice: If the charging case is out of power, it may cause the earbuds to fail to shut down and remain connected to the phone even when they are placed in the charging case. So please remember to charge the charging case in time.

Battery Warning !

There is a built-in lithium battery in the product. Please do not use the product if there is no response to the product to strong sunlight, fire or blow or into fire.

Attention

Please make sure that the products are dry. If there is water droplet on the surface, please wipe it with a dry cloth before putting them back into the charging case to avoid damaging the device.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
