3701 Carling Ave., Building 94
Ottawa, Ontario, Canada
K2H 8S2

Dear Certification Officer:

The attached documentation is provided in support of a formal submission to the Certification and Engineering Bureau of Industry Canada for radio certification. On behalf of our client, we have included an application as defined under the RSP-100 procedure Appendix I and II. It is our belief the methods employed and results contained herein demonstrate the applied equipment was tested in a manner consistent with the regulations defined under RSS-210.

This is a request for "*Re-assessment*" of the Intel Wireless WiFi Link 4965AGN (MN: 4965AGN, IC: 1000M-4965AGN), which is a WLAN adapter (802.11a, 802.11b, 802.11g, and 802.11n). It was tested externally to a computer chassis with a set of Wistron NeWeb Corp. Antennas continuously transmitting and receiving from Chain A, B, and C antenna ports.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas", on a white rectangular background.

Johnny Candelas
Aegis Labs, Inc.
Test Technician
