Flashes red quickly	Water leak alarm

Set up your Water Leak Detector

Note: Before adding Water Leak Detector, make sure the Gateway has been successfully added to the app.

- 1 Enter the page of the gateway.

Tap "  " icon at the top right corner and select "H5044"/"Smart Gateway 1s".

- 2 Pairing Water Leak Detector with the Gateway.

Tap "Add new sub-device"- "H5059" to start pairing, follow the prompts on the page by pressing the button 3s on the bottom of the water leak detector until it flashes red slowly, indicating that the device is waiting to pair with the gateway. After successfully repaired, water leak detector will appear on device page.

NOTE: If you fail to add the water leak detector to the network within 30s, the device will automatically exit pairing.

- 3 Distinguish Water Leak Detector.

Short press the button of the water leak detector, and the corresponding icon on the gateway page will flash.

4 Installing Water Leak Detector.

You can use the device near places where water leaks are likely to occur such as near water pipes, basement sump pumps, dishwashers, washing machines, toilets, water heaters, window wells, etc. And you can click "Network Test" to test the distance of the place.

NOTE: Do not place the device upright, otherwise no alarm will be triggered. Do not place the device on uneven surfaces as this may cause false alarms.

Spicification

Model: H5059

Material: ABS

Dimension: 88*43*25mm (3.5*1.7*1 in)

Weight: 81g (2.85oz)

Alarm Volume: 95dB

Waterproof Rating: IP67

Battery Life: 5 years (Standby mode)

Power: 2*AAA Batteries

Operating Temp: -4°F to 158°F (-20°C to 60°C)

Network : 912.375MHz

Troubleshooting

- ❶ The gateway cannot connect to Wi-Fi. / The connection is unstable.
 - a. 5GHz network is not supported. The device only supports 2.4GHz.
 - b. Check the name of the network and password.
 - c. Place the gateway within coverage of the router signal.
 - d. No obstructions like metal door or wall between the gateway and the detector are suggested.
- ❷ The water leak detector cannot work.
 - a. Pull out the insulation sheet before using.
 - b. Open the back cover via a PH00/PH0 screwdriver, remove and re-install the battery.
 - c. Check whether the battery is running low.

③ No/Delayed notification in the app.

- a. Make sure that Android device users turn on Location and iOS users select "Setting - Govee Home - Location - Always" in the phone.
- b. Keep the distance between the gateway and the detector as close as possible.
- c. No obstructions between the gateway and the detector is suggested.
- d. The time interval between two water detection should be longer than 1 hour, otherwise the app won't push notification.
- e. Check whether the indicator of the gateway flashes when the detector is triggered. If not, please re-add the detector.

FCC and ISED Canada Statement

This device complies with Part 15 of the FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil n' doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if

not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

FCC and IC Radiation Exposure Statement

This equipment complies with FCC and IC radiation exposure limits set forth for an uncontrolled

environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Lors de l'utilisation du produit, maintenez une distance de 20 cm du corps afin de vous conformer aux exigences en matière d'exposition RF.
