Pairing Instruction

2.4G Connection:

Step 1: Switch the keyboard power ON.

Step 2: Take out the USB receiver from the backside of keyboard.

Step 3: Plug the USB receiver into the USB port of the device.

Step 4: Press the 2.4G channel key, the 2.4G status indicator will flash slowly, the keyboard now is in 2.4G mode.

Bluetooth Connection:

Step 1: Switch the power on.

Step 2: Press the BT1 channel key to switch to choose a Bluetooth channel BT1/BT2.

Step 3: Hold and press the Bluetooth channel key for 3 to 5 seconds, the BT indicator will flash quickly, the keyboard now enter into Bluetooth pairing mode.

Step 4: Open "Settings" of your device and click Bluetooth Devices.

Step 5: Choose "Add/Delete Bluetooth Devices, search for "BT+2.4G KB" and click "Pair".

Step 6: Pairing is complete when it shows "BT+2.4G KB Connected"

Bluetooth indicator flashes three times each second, and will flash for 180S.

How to Switch Device Channels

After 2.4G/BT1/BT2 are connected, press the corresponding channel key to switch between devices.

Keyboard Charging

When battery is low, the power indicator light will start to flash until the keyboard turns off. Please recharge as soon as possible to ensure best user experience. Low battery may cause poor connection quality, resulting delays or other problems while using.

The Power indicator light is red while charging and will turn green once fully charged. One full charge cycle takes about 2~3 hours.

Power Saving Mode

The keyboard will enter into sleep mode after being idle for 30 minutes. To activate it by pressing any key and wait for 3s (the activation may lead a typing delay in 3s).

Safety Instructions

1. Keep the keyboard away from sharp objects that could damage it.
2. Do not put heavy objects on the keyboard.
3. Please do not spill coffee, tea or other liquids on the keyboard.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could
void the user's authority to operate the equipment.
