

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled '3', resting on a blue textured surface. The board is irregularly shaped with various electronic components, including a SIM card slot labeled 'SIM1', a TF card slot, and several integrated circuits. A black ruler with white markings is placed vertically to the left of the board, showing measurements from 10 to 70 mm. A horizontal ruler at the bottom shows measurements from 10 to 100 mm.
Solder Board-Component View 4	 A photograph of the same green PCB component, labeled '4', from a different perspective. It shows the underside of the board with various components and solder joints. The same blue textured surface and black ruler are present, with the vertical ruler showing 10 to 60 mm and the horizontal ruler at the bottom showing 10 to 100 mm.

Solder Board-Component View 5	 A photograph of a small, green printed circuit board (PCB) component, labeled '5', mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is a small, rectangular PCB with a gold-colored pad on one end and a small, dark, rectangular component mounted on it. The component is oriented horizontally.
Solder Board-Component View 6	 A photograph of a small, green printed circuit board (PCB) component, labeled '6', mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is a small, rectangular PCB with a gold-colored pad on one end and a small, dark, rectangular component mounted on it. The component is oriented horizontally.
