

## Modular Approval Request Letter

FCC ID: K7T-WIFIHU2S

Date: June 26, 2015

Gentlemen:

There's that would like to have your authorization as a modular approval.

The specific product as below, USB WiFi Module, with its designed features and specified description, meets special requirements for full modular approval on FCC Public Notice DA 00-1407 Released: June 26, 2000 by cross-reference list below.

Company:	Radicom Research, Inc
Product Name:	USB WiFi Module
Model Number	WiFiHU2s-a, WiFiHU2s-c
FCC No.:	K7T-WIFIHU2S

Requirement of Public Notice DA00-1407 / part 15.212	Reference to WiFiHU2s-a, WiFiHU2s-c
1. The modular transmitter must have its own RF shielding.	The module has its own RF shielding. Please see external photo.pdf
2. The modular transmitter must have buffered modulation/data inputs.	The modular has buffered data inputs; it is integrated in chip RTL8192CU. Please see block diagram.pdf
3. The modular transmitter must have its own power supply regulation.	All power lines derived from the host device are regulated before energizing other circuits internal to the WiFiHU2s-a and WiFiHU2s-c. Please see circuit.pdf
4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c).	The WiFiHU2s-a and WiFiHU2s-c meet the IC antenna requirements. It has a unique connector. Please see internal photo.pdf
5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing.	The WiFiHU2s-a and WiFiHU2s-c were tested in a stand-alone configuration via an USB hub PCB. To remove the WiFiHU2s carefully remove it from the six pin headers on the USB interface board.
6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	The label position of WiFiHU2s-a and WiFiHU2s-c are clearly indicated. Please see the label location.pdf
7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The module is compliant with all applicable FCC rules. Detail instructions are given in the Users Manual. Please see Installation guide.pdf
8. The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4).	The WiFiHU2s-a and WiFiHU2s-c comply with applicable RF exposure requirements. Please see MPE report. pdf

Yours truly,

Roger Sheridan  
QA Manager  
Radicom Research Inc
