Reference: Intermec Models CN2G and CN2NI Similarity Attestation

Dear Sirs,

Intermec Technologies Corporation would like to attest that the CN2NI and CN2G models are electrically, mechanically and functionally identical.

The CN2NI model hand held computer was created as a special configuration requirement for a United States government contract. The product was certified using the model name CN2NI to designate it as a Non-Incendive product. However, the contract required that the product be called a CN2G. As a result, the certified name is CN2NI, but the user documentation lists CN2G. Both models refer to the same end product.

Please contact me if you have any questions regarding this attestation.

Sincerely,

Katie Molina
Compliance Engineer
