

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	
EUT Housing and Board View 2	

Solder Board-Component View 1	 A photograph of a small blue printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular and features a large, square, silver-colored component (likely a microcontroller or memory chip) in the center. It has several gold-colored pins or connectors along its edges. The component is placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. The ruler is oriented vertically in the image, with the 0 mark at the top and the 100 mark at the bottom.
Solder Board-Component View 2	 A photograph of the same blue PCB component, labeled 'Solder Board-Component View 2'. This view shows the component from a different angle, highlighting the gold-colored pins and connectors. The component is placed on the same blue textured surface. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. The ruler is oriented vertically in the image, with the 0 mark at the top and the 100 mark at the bottom.

Solder Board-Component View 3	 A photograph of a blue printed circuit board (PCB) component, labeled '3', positioned on a blue textured surface. The component is rectangular with various electronic components, including a large central chip and several smaller components. It is placed next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately from 10 mm to 60 mm.
Solder Board-Component View 4	 A photograph of a blue printed circuit board (PCB) component, labeled '4', positioned on a blue textured surface. The component is rectangular with various electronic components, including a large central chip and several smaller components. It is placed next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately from 10 mm to 60 mm.

Solder Board-Component View 5	
Solder Board-Component View 6	

Solder Board-Component View 7	 A photograph of a small green printed circuit board (PCB) component, labeled '16187AP2' and '2183241', resting on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately from the 10 mm mark to the 40 mm mark. Two thin wires, one red and one black, are connected to the component.
Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component, labeled 'WTX21X03' and 'v1.0.0 21-03-22', resting on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately from the 10 mm mark to the 30 mm mark. Two thin wires, one red and one black, are connected to the component.

Solder Board-Component View 9	 A photograph showing a green printed circuit board (PCB) component with various electronic components and solder joints. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is oriented vertically, with the ruler's markings running horizontally.
Antenna View	 A photograph showing the internal components of a device, including a yellow battery, a green PCB, and two antennas. The device is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The device is oriented vertically, with the ruler's markings running horizontally. Two red boxes with labels point to specific antennas: "Wi-Fi RX Ant" points to a small antenna on the PCB, and "GPRS/ LTE Ant." points to a larger antenna on the PCB.
