

NORTHWEST EMC, INC.

22975 NW Evergreen Parkway, Suite 400
Hillsboro, OR 97124

June 26, 2006

Dear Application Examiner:

On behalf of Intermec Technologies Corporation, Northwest EMC Inc is submitting this application for a Class 2 Permissive Change of the MC75, FCC ID: EHAMC75, to approve a new RF exposure condition. The MC75 was previously certified for limited modular approval in Intermec's 700C computer, co-located with FCC ID: EHABTS080 and FCC ID: EHADRCB. The MC75 will replace the MC46 radio modules in the 700C.

The new RF exposure configurations occur when the 700C is docked in the cradle of several Intermec devices. Each of the devices that the 700C can dock in contain radio modules. Intermec is seeking authorization of the C2PC to permit the mobile co-location of the MC75 radio with these devices' radios. The following radios can be co-located with the MC75 when the 700C handheld computer is placed in their docking stations:

- Bluetooth radio, FCC ID: EHABTS080-1, in the handheld printer, M/N: 6820
- Bluetooth radio, FCC ID: EHABTS080-1, in the handheld printer, M/N: PW40
- RFID radio, FCC ID: EHARFID915PCC-6, in the handheld RFID grip, M/N: IP3
- RFID radio, FCC ID: EHAIM4, in the handheld RFID grip, M/N: IP4

All of these radios have been previously certified.

No changes have been made to the hardware or software of the MC75 in these co-located configurations. Co-located MPE estimates for mobile exposure conditions have been submitted. The exhibits submitted demonstrate compliance with FCC rules.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
