

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

October 4, 2004

RE: DBTEL Incorporated

FCC ID: BW3DB-2068

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Kindly add the required 2.1033(c)(8) information for voltage and currents through the final amplifying device.
- 2.) FYI: Please be sure that all tune-up procedures contain RF output target values and their tolerance. This was discussed today in your phone conversation with AmericanTCB.
- 3.) FYI: No response needed In the future please kindly do your best to shrink the size of your SAR reports. It is difficult for any examiner to manipulate files of this size, either FCC or TCB. Your cooperation would be appreciated.
- 4.) Please refer to page 26 of your SAR report. The summary validation table is presented for body data only. Should there also be head validation data presented?

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
