Solder Board-Component View 3	 A microscopic view of a small, rectangular, green printed circuit board (PCB) component mounted on a larger blue PCB. The component is positioned near a black L-shaped ruler with white millimeter markings. The ruler indicates the component is approximately 10 mm wide and 5 mm high. The background is a light blue textured surface.
Solder Board-Component View 4	 A microscopic view of a small, rectangular, silver-colored component mounted on a larger blue PCB. The component is positioned near a black L-shaped ruler with white millimeter markings. The ruler indicates the component is approximately 10 mm wide and 5 mm high. The background is a light blue textured surface.

Solder Board-Component View 5	 A photograph showing a small electronic component, likely a battery or capacitor, mounted on a blue textured surface. The component is rectangular with a silver-colored top and a black bottom. It is positioned next to a black ruler with white markings. The ruler has two scales: one in millimeters (0 to 100) and one in centimeters (0 to 10). The component is located between the 40 mm and 60 mm marks on the millimeter scale.
Solder Board-Component View 6	 A photograph showing the same electronic component from a different angle. The component is rectangular with a silver-colored top and a black bottom. It is positioned next to a black ruler with white markings. The ruler has two scales: one in millimeters (0 to 100) and one in centimeters (0 to 10). The component is located between the 40 mm and 60 mm marks on the millimeter scale.
