

YsxLite

Installation APP

Mobile phone scan the following QR code for download and installation. Name of Software: YsxLite.

Connection method 1: no network connection

1. Connect the machine's own hot spot, the hot spot at the beginning of SAT. Click Connect. After the link is successful, return to APP, as shown in the following figure.

1. Click to open the system WiFi interface. 2. Click on SAT starting point.

3. After entering the app, follow the steps below.

1. After the successful connection is displayed, click Screen sharing.

Connection method 2: internet connection

1. Connect the machine's own hot spot, the hot spot at the beginning of SAT. Click Connect. After the link is successful, return to APP, as shown in the following figure.

1. Click to open the system WiFi interface. 2. Click on SAT starting point.

Connection method 3: internet connection

1. No network link has been completed, you can watch the video closely.

Note: You can't remotely monitor the WiFi that links the camera within 4 meters of the camera every time you view it without a network link. With WiFi at home, you can perform the following steps to achieve remote monitoring.

Connection method 4: internet connection

2. Find your own WiFi account and enter the password correctly, then click OK to return.

1. Click on the phone in the figure. 2. Click WiFi settings. 3. Find WiFi and enter the password link.

3. When you return to the APP, you will see that the reminder link is successful. At this time, you can click the play button to view the screen, and the remote setting is successful.

After the link is displayed successfully, watch the screen.

Note: As long as the WiFi password is correct, it can be linked. If it cannot be linked, first forget the router password, verify the password, and then re-link it.

Class B device:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The distance between user and products should be no less than 20cm.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
