* Inside package: alarm clock charger, charging cable, manual.

* power adapter is not included. Please purchase otherwise or use phone original adapter.

III. Specificaiton

Input: DC 5V-3A, 9V-2A, 12V-1.5A

Output power: 15W (max)

Charging efficiency: 85%

USB Output: 5V-2A(max)

Size: 200x115x77mm

IV. Applicable Equipment

Products qualified with Qi standard.

TECHFROG

THANK YOU!

Thank you very much for purchasing TECHFROG products.

If you find any problems during use, please contact us via Amazon in time,
We promise to reply within 12 working hours.

Your valuable opinions and suggestions are the driving force for our
continuous improvement of products and services.

The warranty period of this product is 1 year from the date of purchase.

This device complies with part 15 of the FCC rules . Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
- This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
